

549 810

Installation

IMPORTANT - Do not open immediately. Before opening, acclimate planks for 48 hours by laying each box horizontally and individually in center of room where they will be installed. Make sure the subfloor is clean, dry and flat. Always use safety glasses and a mask. Visit our website for more help.

Subfloor surfaces for Manufacturer Laminated Flooring:

- Existing floor surfaces including hardwood floors, linoleum, resilient vinyl, PVC (plastic floor surfaces must be permanently attached to the subfloor, never left, dry) ceramic flooring
- Concrete on all grades/elevations (maximum residual moisture 2.0 CM%). With a calcium chloride test, the maximum acceptable reading is 5.0 lb/24 hours/1000 ft².
- Asphaltic and Anthropic tiles (max residual moisture 0.3 CM%).
- Magnesium Cement (max residual moisture 0.3 CM%).

Instalación

IMPORTANT - No abrir inmediatamente. Antes de abrir, debes acostumar los tablones durante 48 horas colocando cada caja horizontalmente y de forma individual en el centro de la habitación donde se van a instalar. Asegúrate que el contrapiso esté limpio, seco y plano. Usa siempre gafas de seguridad y una máscara. Visita nuestro sitio web para obtener más ayuda.

Los contrapisos apropiados para el Piso Laminado del Fabricante son:

- Superficies de los pisos existentes, incluyendo pisos de madera, linóleo, vinilo, PVC (las superficies de pisos de plástico deben estar permanentemente adheridas al contrapiso), cerámica seca, gres de cerámica (en seco)
- Pisos de cemento en todos los niveles/elevaciones (máximo contenido residual de humedad 2.0 CM%). Con una prueba de cloruro de calcio, la medida máxima aceptable es 5.0 lb/24 horas/1000 ft².
- Asfáltico y losas de Anhídrito (0.3 CM% de humedad residual máxima).
- Cemento de magnesio (0.3 CM% de humedad residual máxima).

For Successful Installation, remember:

1. Acclimate for 48 hours before installing (buy on Wednesday to install Saturday).
2. Identify the tongue side and the groove side.
3. The tongue side (the smaller extension without a ridge on it) goes against the beginning of the wall.

Por favor instale los tablones dentro de 48 horas antes de la instalación (comprólos el Miércoles para instalarlos el Sábado).

1. Acomoda los tablones durante 48 horas antes de la instalación (comprólos el Miércoles para instalarlos el Sábado).
2. Identifica el lado con lengüeta y el lado con ranura.
3. El lado con lengüeta (la extensión más pequeña sin surcos) va contra la pared inicial.

Install vapor barrier if subfloor is cement (6 mil polyethylene film).

Instala una bánera de vapor si el contrapiso es de cemento (papel de polietileno de 6 milipulgadas).

Always use an underlayment padding above the vapor barrier and below the laminate flooring planks. If pad is pre-attached, no additional underlayment padding should be used.

Usa almohadilla para amortiguar sobre la bánera de vapor y debajo del tablón de piso laminado. Si la almohadilla está previamente adherida, no es necesario utilizar ninguna base para piso.

If possible, start to lay panels under the door jam and finish installing planks on a wall without a door jam. Undercut door Jam. See Working with Limited Clearance section.

Si es posible, comienza a colocar los tablones debajo del marco de la puerta y termina instalando tablones en una pared que no tenga jambas. Recorta la jamba de la puerta. Consulta la sección Trabajar con Limitaciones de Espacio.

Start placing panels so that tongue sides face the wall. Confirm first row is straight. Comienza a colocar los paneles de forma tal que el lado con lengüeta quede frente a la pared. Comprueba que la primera fila esté recta.

Remove the tongue on the panels that about the walls to allow room for spacers and prevent problems from spills.

Quita la lengüeta de los paneles que colisionan con las paredes para dar espacio a los separadores y evitar problemas ocasionados por derrames.

Engage next plank and slide into overlapping end joints position.

Encuadra la tabla siguiente y deslizala hasta que esté superpuesta a las juntas de los extremos.

Push down to engage end joint. Long joint of next rows hold joint in place. End joints in first and last rows are held in place by base molding 1/4 round.

Empuja para encuadrar y unir. La junta larga de la tabla siguiente sostiene la junta del extremo en su lugar. La moldura base redondeada de 1/4 mantiene las juntas de los extremos de la primera y última fila en su lugar.

Always allow for 5/16" - 3/8" expansion around fixed objects.

Siempre deje una expansión de 0.7 cm a 0.9 cm alrededor de objetos fijos.

An expansion gap T-strip is required when length of planks measure 40" max and when the distance between the door jam and the wall is less than 12". The T-strip should be placed in all doorways directly under the door when the door is closed.

Se necesita un listón en T para expansión si los tablones miden 12.19 cm de largo y 0.62 m de ancho. El listón de expansión de tracción deberá colocarse en todas las juntas directamente debajo de la puerta cuando está cerrada.

Engage next plank and slide into overlapping end joints position.

Encuadra la tabla siguiente y deslizala hasta que esté superpuesta a las juntas de los extremos.

Cut the row along the wall to account for the unevenness of the wall while leaving 3/8" (10 mm) clearance.

Corta la fila a lo largo de la pared para acomodar el desnivel de la pared dejando un espacio de 0.9 cm para expansión (tablón de 6.3 cm de ancho mínimo).

Always allow for 5/16" - 3/8" expansion around fixed objects.

Siempre deje una expansión de 0.7 cm a 0.9 cm alrededor de objetos fijos.

To measure and cut last piece in a row, rotate offset section 180°, mark accordingly, cut, rotate back 180° and cut into pieces.

Para medir y cortar la última pieza de una fila, gira la sección de recorte 180°, marca debidamente, corta, gira nuevamente a 180° y coloca en el espacio.

Ensure floor is able to expand. Verifica que el piso pueda expandirse.

Verifica que el piso pueda expandirse.

Remove the top part of the groove profile. Quitar la parte superior del borde de la ranura.

Slide panel into space horizontally and set into profile. Use these modified planks under doorframes, radiators, cabinet fronts, etc.

Desliza el panel horizontalmente hacia el espacio y encuadralo en el fondo. Usa estos tablones modificados debajo de marcos de puertas, radiadores, gabinetes, etc. Usa la barra de fricción para deslizar los tablones donde sea necesario.

Use good quality wood glue to make the connection.

Usa un pegamento para madera de buena calidad para hacer la conexión.

Some long edge joints cannot be installed using a 20° angle.

Algunas juntas con bordes largos no pueden instalarse con un ángulo de 20°.

Remove top part of the groove profile.

Quita la parte superior del borde de la ranura.

Slide panel into space horizontally and set into profile. Use these modified planks under doorframes, radiators, cabinet fronts, etc.

Garantía

Attention! Without a documented measurement of residual moisture content, a claim against the manufacturer for damages cannot be considered. Moisture content of wood subfloor must be less than 14%. Concrete subfloors must always be covered with a 6 mil vapor barrier even if linoleum, PVC or resilient vinyl is firmly attached to the concrete.

Limited Residential Warranty

This Limited Warranty is made by Manufacturer* and is limited to Manufacturer's Laminated Flooring. Manufacturer warrants to the original purchaser that the surface wear layer on Manufacturer Laminated Flooring shall not show wear-through, staining or fading due to sun or artificial light for a period indicated on the date of sale. Manufacturer's limited warranty when used under normal conditions in a dry, indoor, residential setting. The wear layer must be readily visible from a distance of 6 feet, measuring at least 1 square inch. Wear-through at the edges of Manufacturer Laminated Flooring is excluded from the warranty. Gloss fading is not wear-through.

Manufacturer Laminated Flooring must be installed following the recommended procedures and all accessories must have been approved by Manufacturer. All Manufacturer Laminated Flooring products must be inspected for possible, recognizable defects before and during the installation as any right to claim under warranty becomes invalid after panels with visible defects have been installed. This warranty applies only to the original purchaser of Manufacturer Laminated Flooring and is not transferable.

Warranty does not cover damage caused by water damage, fire, abuse, negligence, impact, severe impact, scratch, negligence, fire, flooding, this warranty is of diminishing value. This warranty takes account of loss of value resulting from use. In the event of a claim under the terms of the Manufacturer's Limited Residential Warranty, Manufacturer will provide the repair or replacement of damaged material at no charge to the original purchaser. Repair or replacement of damaged material will be provided by Manufacturer or by an authorized Manufacturer representative, according to such, but not limited to, damage caused by scratches, severe impact, cutting negligence, fire, flooding. This warranty is of diminishing value. This warranty takes account of loss of value resulting from use.
