GTD18GSSJ

GE® 6.8 cu. ft. capacity Dura Drum gas dryer

Dimensions and Installation Information (in inches)

Exhaust Options: When viewed from the front of the unit, exhaust 3-way via rear, left and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

Electric: An individual, properly-grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15 or 20 amp circuit breaker or a time-delay fuse, is required.

Gas Dryer Electric Rating: 120V, 60Hz, 6A

Gas (BTU/HR): 22,000. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires a conversion kit. Check installation instructions for correct kit and have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Note: Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

Installation Information: For complete information, see installation instructions packed with your dryer.

Alcove or Closet Installation:

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer MUST be exhausted to the outside
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are: 0" either side and 3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc. is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a
 minimum of 60 sq. in. of open area equally distributed. If this closet contains both
 a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area
 equally distributed.
- No other fuel-burning appliance shall be installed in the same closet with a gas dryer.

GTD18GSSJ GE® 6.8 cu. ft. capacity Dura Drum gas dryer

Special Installation Requirements

Ducting Materials: 4-way via rear, right, left and bottom.

Exhaust Length Calculation:

- 1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
- 2. The maximum length of 4" rigid (aluminum or galvanized) duct which can be tolerated is shown in the table. The maximum length for flexible ducts are less than for rigid duct.

A turn of 45° or less may be ignored. Two 45° turns within the duct length should be treated as a 90° elbow.

A turn over 45° should be treated as a 90° elbow.

Exhausting the dryer to the outside is strongly recommended to prevent large amounts of moisture and lint from being blown into the room. Gas dryers or any drver located in a closet **must** be exhausted to the outside.

Caution: For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down.

Other terminations, such as louvered wall boxes, are acceptable provided they are equivalent to a 4" opening dampered wall cap.

For more information on venting kits and accessories, please call 1-800-GE CARES.

For every extra 90° elbow, reduce the allowable vent system length by 10 ft. Two 45° elbows will be treated like one 90° elbow. For the side exhaust installations, add one 90° elbow to the chart. The total vent system length includes all the straight portions and elbows of the system (transition duct included).

Dryer exhausting information—use metal duct only vertical and horizontal ducting

GTD18GSSJ

GE® 6.8 cu. ft. capacity Dura Drum gas dryer

Features and Benefits

- Dura Drum interior provides long-lasting dependability
- 4 heat selections provide the right temperatures for your clothes-drying needs
- End-of-Cycle Signal Alerts you when the load is done, so clothes can be removed before wrinkles set in
- Auto Dry monitors air temperature to set dry times
- Model GTD18GSSJWW White on white
