BEYOND THE KITCHEN

Designer Series cabinetry makes a beautiful statement throughout your home. Create an entertainment center or new bath, and so much more. Add storage to a laundry room, bedroom, foyer or office.

Disclaimers

Wood: Wood species in all finishes will exhibit color changes when exposed to different types of light and environments over time. Such color changes are expected, and are not defects. Graining differences, mineral streaks and color variations are expected in wood cabinetry. Hampton Bay Designer Series door styles often exhibit these characteristics and such graining differences, mineral streaks or color variations are not defects.

Preventing Heat and/or Humidity Damage

Various cooking ovens, ranges, cook tops, cooking pots, toasters and other small appliances produce high heat and/or humidity. It is very important to make sure these products are positioned so rising heat is not trapped or confined, otherwise, you risk damage to cabinets or moldings that is not covered under the warranty. In addition, if higher temperature settings are used for extended periods of time, the radiant heat may be excessive and the doors and drawer fronts should be shielded or removed. This is particularly important on Thermofoil doors, which cannot be exposed to extended temperatures beyond 160 degrees without risking permanent damage. We recommend the use of a heat deflector for Thermofoil kitchen installations.

Finish Names

Thunder RTF, Driftwood RTF, Glacier RTF, White RTF, Heron Gray RTF, Spice, and Espresso are finish names. These names do not represent wood species; they are simply names intended to identify a particular finish.
