

60-Gallon Basketweave Urn

Rainwater Collection System

includes
downspout
diverter kit!

rescue[®]
environmentally
responsible products

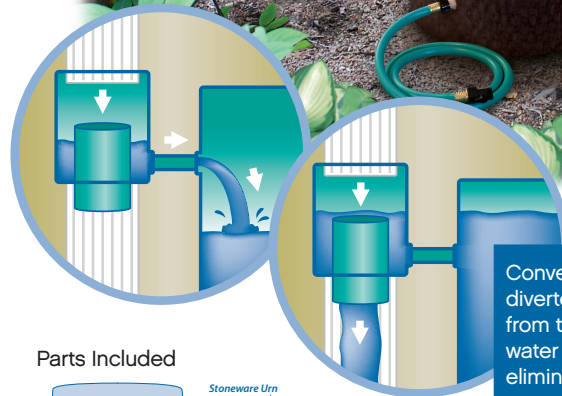

The Rescue[®] Basketweave Urn Rainwater Collection System is both earth-friendly and money-saving. By reducing dependency on water from municipal sources, the energy demand for purifying water used for yard and garden purposes is reduced. Collecting rainwater eliminates strain on wells and water systems during drought conditions, and you save real dollars by reducing your monthly water and sewer bills.

- Top of urn is an extra-large planter
- Planter has built-in weep hole to prevent plant roots from rotting
- Easy to install / Instructions Included
- Includes a downspout diverter kit that fits a 2" x 3" or 3" x 4" downspout
Will fill 60-gallon container in approx. 2 to 3 hours during a moderate rainfall.
- Can be connected to a soaker hose for convenient automatic watering of nearby plants/gardens
- Convenient-to-use manual shut-off valve
- Durable, UV-stable, 25%-recycled resin
- Linkable in groups of two or more

good for plants: Soft, pure, chemical-free rainwater maintained at proper ambient temperature helps plants grow vigorously. Cold, chlorinated water from most tap systems can shock plants and slow growth.

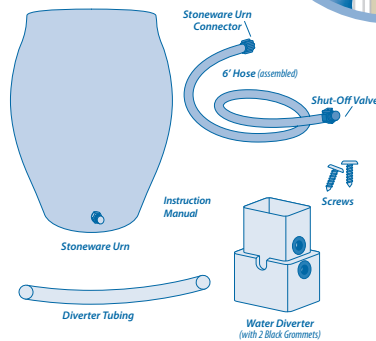

with built-in
planter

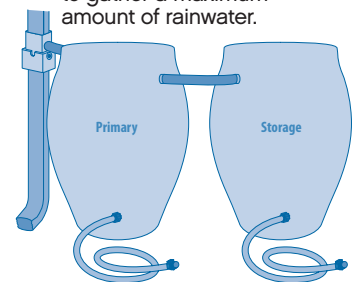

Convenient downspout water diverter channels rainwater from the downspout to the water collection reservoir and eliminates reservoir overflow.

Parts Included

Urns can be linked together to gather a maximum amount of rainwater.

Tools And Supplies Needed
Screwdriver, Tape Measure, Hacksaw, Level, Pencil, Safety Glasses, Wood Board, Gloves, Drill and 3/4" Drill Bit.
