

NEW! AccuMASTER™ Pro

10" DIGITAL TORPEDO LEVEL Model 7210

Accurate, Easy-to-Read and Built to Last

The **AccuMASTER Pro** 10" level accurately finds plumb, level and every angle in between – displaying it on a bright easy-to-read LED screen. If you work with the level upside down you can read the display because it rotates for easier viewing. You can turn on the level's audio alert feature to sound when it finds plumb and level.

The level displays readings in angle degrees, feet-inches, millimeters, meters or percent slope depending on your building need. It provides accurate measurements in any weather. Built to last, it is dust and water resistant and has a solid aluminum body with a sturdy V-groove base with magnets. It is tough enough for any jobsite use.

Find the type of angle you need anywhere with digital accuracy

- Pitch – Measure rise and run of angles like a roof in inches/feet or millimeters/meters
- Slope – Measure an angle in percent or degree
- True Level – Displays the absolute angle of a work surface
- Relative Angle Measurement – Compares the angle between two work surfaces
- Set Audio Alert for plumb and level
- Display "Holds" to allow unit to move for easier reading
- Includes protective pouch, 2 AAA 1.5 volt batteries and 2-year warranty

Bright LED display always reads right side up for easy reading

Accuracy: $\pm 0.2^\circ$

Rubberized end caps

Sturdy V-Groove base with magnets for use on metal pipes and conduit

IP54 Certified dust and water splash resistant
