METAL CONSTRUCTION

DuraMax Imperial Metal Building are StrongLasting™, which means they are not just strong and durable, they are also low maintenance. They are the strongest steel outdoor building you can find today. Most Metal Buildings have thin, flimsy walls that dent and ding soon after you assemble them. DuraMax Buildings have thicker steel walls and a special rib design for greater strength and dent resistance. They are wider and taller comparable to other metal sheds. You get a tall walk-in building with much more room for SUV or storage.

PACKAGING

Imperial Metal Building ships in two crates:
 12x20' Packaging Dimensions: 112.5"w x 45"d x 16" h 890 lbs.
 12x26' Packaging Dimensions: 112.5"w x 45"d x 21" h 1205 lbs.

Ship common carrier required lift gate on residential delivery

The Imperial Metal Building is packaged in one crate and one cardboard box. The packaging includes all components, hardware and an illustrated step-by-step instruction booklet.

ASSEMBLY MADE EASY

All parts are pre-cut, drilled and numbered for ease of assembly. All you need to provide is a level ground surface with or without concrete, the size of the desired shed. In addition you will need a drill with a philips head, hammer, pliers and a ladder.

✓ Checklist Prior to Imperial Metal Building Purchase

- Check with your local city hall for building ordinances & CCR's
- Be sure that intended placement of Imperial Metal Building is within your property lines
- Do not build shed over utility lines (gas, electrical, water, telephone, cable, etc)
- Measure the size of the intended Imperial Metal Building site and make sure you have a level ground or concrete foundation
