

CARE AND CLEANING GUIDE

HEARTLAND CABINETS THERMOFOIL DOOR CABINET CARE RECOMMENDATIONS

Our interior and exterior cabinet surfaces are highly moisture resistant and durable, giving you year of service. Clean with any well known household cleaning liquid that is safe for plastics. Do not use any solvents, or agents containing acetone, acetate and ethyl alcohol. Use of ammonia is permitted as long as it is diluted properly. A damp cloth and mild soap is the proper cleaning combination.

IMPORTANT: Never leave a wet cloth with water or solvents on any cabinet surfaces for extended periods of time. Avoid abrasive cleaners and abrasive cleaning tools such as scouring pads.

AVOID EXCESSIVE HEAT

Self cleaning appliances will generate excessive heat during the cleaning cycle. If you have an oven adjacent to your cabinets, cabinet doors and drawers should remain open or removed during the cleaning cycle., to avoid possible damage to cabinet finish and surface.
