Installation Instructions* for French Door Bottom Freezer/Refrigerator

*Please refer to your Use & Care Guide for more details.

WARNING
To avoid electric shock, which can cause death or severe personal injury, do not connect the water supply line to the electrical supply line.

NOTE
If you need to remove the doors to get your refrigerator into the house, please refer to “Removing Doors” in the Use & Care Guide. Frigidaire recommends that you use a service or kitchen contracting professional to install your refrigerator.

CAUTION
If you are not satisfied with the installation of your refrigerator, please contact the store where you purchased it or call 1-800-944-9044 for assistance.

To Install Water Supply Line To Ice Maker Inlet Valve
1. Disconnect refrigerator from electric power source.
2. Place end of water supply line into sink or bucket. Turn ON water supply and flush supply line until water is clear. Turn OFF water supply at shutoff valve.
3. Remove plastic cap from water valve inlet as far as it will go (¼ inch).
4. If you use copper tubing - Slide brass compression nut, then ferrule (sleeve) onto water supply line. Push water supply line into water valve inlet as far as it will go (¼ inch). Slide ferrule (sleeve) into valve inlet and finger tighten compression nut onto valve. Tighten another half turn with a wrench; DO NOT overtighten. See Figure 1.
5. If you use stainless steel tubing - The nut and ferrule are already assembled on the tubing. Slide compression nut onto valve inlet and finger tighten compression nut onto valve. Tighten another half turn with a wrench; DO NOT overtighten. See Figure 2.
6. Connect water supply line (copper tubing only), about 2½ turns, behind refrigerator as shown and arrange coils so they do not vibrate or wear against any other surface.
7. Turn ON water supply at shutoff valve and tighten any connections that leak.
8. Reconnect refrigerator to electrical power source.
9. To turn ice maker on, lower wire signal arm from household water supply to the “ON” position (freezer ice maker) or set the ice maker’s On/Off power switch to the “ON” position (fresh food ice maker).

NOTE
Check with your local building authority for recommendations on water lines and associated materials prior to installing your new refrigerator. Depending on your local/state building codes, Frigidaire recommends for homes with existing valves its Smart Choice water line kit 5305510264 (with a 20 ft. Copper Water Supply Line kit 5305510263 [with a 20 ft. Copper Water Supply Line with self-sealing saddle valve]). Please refer to www.frigidaire.com for more information.

3 Level Refrigerator
Guidelines for final positioning of your refrigerator
All four corners of the cabinet must rest firmly on the floor.
The doors should sit flush (⅛ inch) from front to back (to ensure that doors close and seal properly).
Both doors should align with each other and be level.
Most of these conditions can be met by raising or lowering the adjustable front rollers.

To level the cabinet using the front rollers:
1. You can raise or lower each door. Use a ⅛ inch socket wrench to turn the adjustment screws (per side). To raise: turn adjustment screw clockwise.
2. Ensure both doors are bifold-free (without binding) touching the cabinet on all four sides and that cabinet is stable.
3. After unit is leveled, lower anti-tip leg until it contacts the floor.

To Connect Water Supply Line To Ice Maker Inlet Valve
• Never use refrigerator handles to move the refrigerator.
• Never use a self-piercing type valve.
• Be sure to coordinate site preparation and installation with necessary utilities (gas, water, etc.).

Preparing For Installation

Be sure to coordinate site preparation and installation with your kitchen contractor.

Include these minimum guidelines in your site preparation:
• Choose a place near a grounded electrical outlet.
• Do not use an extension cord or an adapter plug.
• Avoid direct sunlight and keep as close as possible to the drain, dishwasher or other heated surfaces.

Level Refrigerator
To level the cabinet using the front rollers:
1. Installing doors: Refer to “Installing Doors” in the Use & Care Guide.
2. Doors final adjustment using the adjustable lower hanger (select models, if necessary):
   A. Open doors to 90 degrees.
   B. Lift and adjust the washer clockwise.
3. To raise the door: To raise the door:
   A. Remove hex head screws from toe grille:
   (2 on each side) to allow drawer to lev
   B. If gasket is not sealed, open drawer and slightly loosen 4 drawer screws (2 on each side) to allow drawer to move.
   C. Close drawer and recheck the seal on the gasket (A). Open the drawer grabbing by the sides in the center (B). Be careful not to rotate the drawer.
   D. Tighten 4 drawer screws.
   E. Recheck gasket seal.
   F. Install the toe grille by fitting it into place.

To Avoid Property Damage:
• Never use a self-piercing type valve.
• Be sure to coordinate site preparation and installation with necessary utilities (gas, water, etc.).

Electrical Power
• House power turned on
• Ice Maker plugged in

Installation Check List

4 Installing & Leveling Freezer Drawer (if necessary)
1. Installing drawer: Refer to “Installing Drawers” in the Use & Care Guide.
2. Leveling freezer drawer:
   A. Check gasket seal around top, bottom, and sides of freezer drawer.
   B. If gasket is not sealed, open drawer and slightly loosen 4 drawer screws (2 on each side) to allow drawer to move.
   C. Close drawer and recheck the seal on the gasket (A). Open the drawer grabbing by the sides in the center (B). Be careful not to rotate the drawer.
   D. Tighten 4 drawer screws.
   E. Recheck gasket seal.
   F. Install the toe grille by fitting it into place.

6 Remove Internal Shelves and Drawers
Frigidaire uses packing foam and tape to secure the internal parts of your refrigerator for shipping. Once the refrigerator is in position, you can remove this material.

What's Next?
Congratulations! You are ready to begin enjoying your new Frigidaire refrigerator.

For important safety instructions and to learn how to operate your refrigerator, please read your Use & Care Guide. You may want to start with the “Normal Operating Sounds & Smells” section of the Guide to learn what to expect during typical operation.

Please register your product. You can register online at www.frigidaire.com or you can simply send in the Registration Card.
