

Care and Maintenance

★ Cleaning

☆ Cleaning the indoor unit

1. Turn off the air-conditioner and remove the electrical plug from the outlet.
2. Wipe the indoor unit with dry cloth or wet cloth which is dipped by cold water.

⚠ Note :

- Don't use water above 45°C to wash the panel, or it could cause deformation or depigment.
- Don't use thinner, polishing powder, benzene and other volatile chemicals.
- Don't use liquid or corrosive detergent clean the appliance and don't splash water or other liquid onto it, otherwise, it may damage the plastic components, even cause electric shock.

☆ Cleaning air filter

1. Raise up the front panel of indoor unit until it suddenly stop, then raise up the protruded part of air filter, and then take it out.
2. Use a vacuum cleaner or wash them with water, then dry it in the shade.
3. Reinsert the air filter into the indoor unit until being entirely fixed, then close the front panel.

★ Maintenance

1. Select "FAN" operation mode, make the air conditioner run a long time to dry.
2. Turn off the air conditioner and cut off the power supply.
3. Take out the batteries from the remote controller.
4. Clean air filters and other parts.

Troubleshooting

Check the following before requesting on service centre if the malfunction occurs.

Phenomenon	Trouble shooting
Air conditioner dose not operate at all	<ul style="list-style-type: none"> ● Has the power been shut down? ● Is the wiring loose? ● Is the voltage higher than 1.1 times of max rated voltage or lower than 0.9 times of min rated voltage? ● Is the fuse burnt? ● Does it reach the set time for start up?
