How to Measure Your Truck	68

At JOBOX we understand the importance of protecting your equipment.

Whether it's protection from theft, shelter from the elements, or improved on-site safety, JOBOX on-site and truck storage solutions offer superior strength, security, and durability. We utilize innovative design, in-depth research, cutting-edge technology, and extensive testing to continually improve the performance and value of our products.

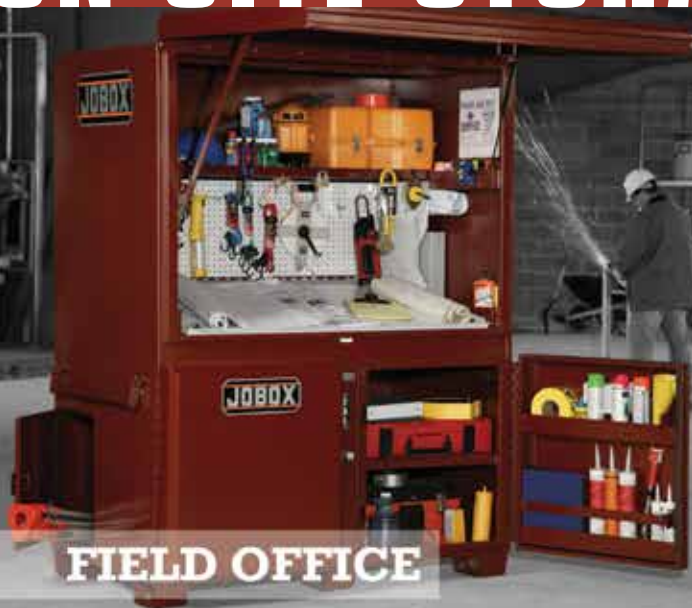

JOBOX On-Site Storage Solutions provide premium protection for valuable tools and equipment with features like our Site-Vault™ Security System, EZ-Loader® Skid Bolsters, Staked and Welded Hinges, and Heavily Reinforced Lids.

JOBOX Truck Storage Boxes offer ultimate security with our Self-Adjusting Dual Rotary GearLock II™ Latching Mechanism, RSL® Beveled Edge Lids, and Industrial-Grade Steel Hinges.

JOBOX Flammable Storage Cabinets and Cans add improved safety and superior heat and fire resistance to legendary JOBOX quality, security, and durability with innovative features like EZ-Level™ Bolsters, Bright White Cabinet Interiors, Anti-Tip Bolster Design, and Fork Lift Capability.

JOBBOX gives your valuable tools and equipment the ultimate on-the-job site protection from weather and theft.

EZ-LOADER[®] SKID BOLSTERS

- Patent-Pending Bolsters provide time-saving and safety features
- Easily load or unload from any side on trucks, trailers, or docks
- One-piece 7-Gauge Steel Skid Bolsters reinforce the bottom of the box for heavier loads and to protect from drops

STAKED & WELDED HINGES

- 14-Gauge Steel
- High Security, 3/8" Continuous Hinge with 1/4" steel pin and extra-large 1" knuckles
- Pin cannot be driven out

HEAVILY REINFORCED LID

- Full-Length "A-Frame" Lid Bolster
- Resists bending from cargo placed on top of the box and from attempted break-ins

OPTIONAL CASTERS

- Casters provide added mobility
- Set includes one pair each of fixed and swiveling casters

RECESSED HANDLES

- Extra tall and deep recess areas prevent pinched fingers and damage to the handle
- Allows easy storage with handles out of the way.

SITE-VAULT[™] SECURITY SYSTEM

- Patented System has Full-Length Steel Lock Console with Three Locking Points
- Formed Lid Sides Welded to Lid Bolsters Resist Pry Bar Entry
- Padlock installs inside fully-welded 14-Gauge Steel Housing
- Fluorescent Reflective Orange Tape indicates when Chest is unlocked

GRIP-RITE[™] LIFTING CHANNEL

- Formed and Welded Channel increases door or lid strength
- Provides safe, easy to grip channel for lifting lid or pulling door

GAS SPRINGS GUARDS

- Protect Gas Springs from Damage and Jamming
- Heavy duty gas springs help lift and control lid, improves safety

TEXTURED POWDER PAINT FINISH

- High-Quality Powder Paint improves durability over liquid paint
- 8 Color Options Available [Min. Order Quantity Required]

10x	5x	2x	2x
corrosion resistance	abrasion resistance	chip resistance	scratch resistance

SLOPE LID CHEST

Hold your morning meetings around the JOBOX Slope Lid Chest. The locking lid makes the perfect surface for working on plans and laptops on the job site. Also includes the popular Lift-N-Stow shelf for more storage choices.

-  Site-Vault™ Security System
-  Staked & Welded Hinge
-  Grip-Rite™ Lifting Channel
-  Heavily Reinforced Lid
-  Recessed Handles
-  Holes to Install Optional Casters
-  Textured Powder Paint Finish
-  Gas-Spring Guards

Designed for extreme applications, the JOBOX Heavy Equipment Box provides durability for any job site. This innovative design combines JOBOX toughness with total access, by adding our industry leading drop down ramp. The user-friendly bolster reinforced ramp makes rolling larger, heavier tools and equipment into the box easy and safe. Storage bins on the side walls and additional welded storage on the back wall make organization effortless. The addition of reinforcement to the bolsters and around the perimeter makes the Heavy Equipment Box the strongest storage solution available.

SAFETY STORAGE STORAGE CHECKLIST

FLAMMABLE LIQUIDS

Frequent inspection is an extremely important aspect of safe flammable liquid handling and storage. Establish a regularly scheduled visual inspection of every safety cabinet in your facility to verify compliance with all applicable regulations. Do not become complacent. A little preventative work can go far in preventing a fire hazard.

Periodically verify the following items for each cabinet in your facility and correct immediately if not in compliance:

Ensure the immediate area where the cabinet is located is clear of debris and away from running machinery or any activity involving heat. The floor or decking beneath the cabinet should be solid and stable.

For self-closing cabinets, verify that fusible link assemblies for all doors are properly installed and that only OEM (from the original manufacturer) fusible links are used.

Ensure Material Safety Data Sheet (MSDS), whether paper or electronic, for the liquid being stored is close by and readily accessible.

Ensure contents of cabinet are organized so all contents are visible and identifiable without moving items out of the way. Verify that all containers in the cabinet are properly closed and sealed.

Ensure shelves are clean and sit fully in the side wall brackets.

Ensure cabinet is properly grounded to facility grounding grid or earth source if applicable. Grounding is mandatory if liquids are ever transferred from inside the cabinet.

Using a standard bubble level, verify that the cabinet is level.

Verify that there is no debris accumulation underneath the cabinet.

Verify that the cabinet sump is clean and empty. If liquid or debris is found, ensure it is removed immediately using approved procedures and properly disposed of.

Verify that cabinet is properly vented if required. If cabinet venting is not required, ensure cabinet is in a well ventilated area and that venting caps are tightly closed.

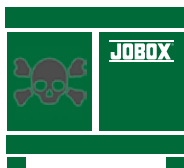

Verify that cabinet is locked and that only properly trained and authorized personnel have access.

Ensure cabinet is the appropriate color for the liquid being stored.

SAFETY COMPLIANCE

JOBBOX cabinets and cans comply with all applicable specifications set forth by the Occupational Safety and Health Administration (OSHA) and the National Fire Protection Association (NFPA). JOBBOX self-closing cabinets also comply with the International Code Consortium/International Fire Code (IFC). Compliance to these specifications has been independently tested and listed by Underwriters Laboratories (UL) the internationally recognized third-party testing organization.

SAFETY CANS

- NFPA Compliant Container for Storage of Kerosine (Blue can) or Diesel (Yellow can)
- NFPA Compliant Container for Storage of Gasoline (Red can)
- Specified by the Safety Professional ~ Required by OSHA in the Workplace
- Meets ASTM F839/F926

SAFETY / SELF-CLOSING SAFETY CABINETS

- Specified by the Safety Professional ~ Required by OSHA in the Workplace
- Meets requirements of OSHA 29 CFR 1910.106
- IFC Compliant
- Meets requirements of NFPA 30

JOBBOX SAFETY STORAGE))))

The innovative features of JOBBOX safety cabinets and cans make flammable liquids storage compliance easier.

EZ-LEVEL™

SKID BOLSTERS

- Leveling Screw Access Hole provides quick and easy access
- Unique Anti-tip Design extends the base foot print beyond the width of the cabinet for maximum stability and tipping resistance
- 7-Gauge Steel Construction
- Fork Lift and Pallet Jack Ready for increased mobility and easy cleaning underneath the cabinet.

SELF-CLOSING SYSTEM

- Self-Latching 3-Point Door Lock System
- Heavy-Duty Enclosed Staggering Mechanism ensures doors close in proper order
- Stainless Steel Slam Latches
- Heavy-Duty Chain holds doors open during work
- Fusible Chain Link shears at 165°F to close doors

BRIGHT WHITE INTERIOR

- Maximum Visibility in low light conditions, allowing users to quickly and safely identify cabinet contents

HI-VIZ SAFETY LABELS

- Safety and Warning Labels provide permanent reminder and reference for users to follow proper safety and usage practices
- Sharp Contrasting Colors for high visibility

EXTRA-WIDE DOORS

- 2.5" Thick Doors provide greater insulation gap between metal panels for added durability and safety

STAKED HINGES

- 14-Gauge Steel
- 3/8" Staked, Continuous Hinge with 1/4" steel pin and extra-large 1" knuckles
- Pin cannot be driven out for added security

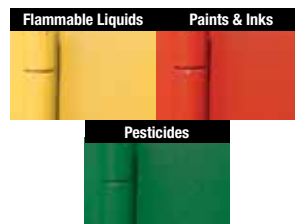

SPILL GUIDE SHELVING

- Safety Cabinet Shelves gently guide spills
- Liquids are guided toward the 2" deep leak-proof sump for easy clean-up

SELF-CLOSING SAFETY CABINETS

With JOBOX Self-Closing Cabinets, users can work freely with peace of mind knowing that their flammable liquids will be secure. Extra-robust fusible link system will operate at 165°F to close the doors, and a heavy-duty, galvanized staggering mechanism ensures the doors close securely in the event of a fire. Fully enclosed, the JOBOX self-closing system ensures safe operation while offering maximum storage space inside the cabinet.

JOBBOX PROFESSIONAL TRUCK STORAGE))))

GEAR-LOCK II™ LOCKING SYSTEM

- Ratcheting action pulls lid tight to resist over **2,000 lbs.** of prying and pulling force
- Provides the highest level of security and moisture resistance available
- Self-adjusting dual rotary lock system is covered by a heavy-duty guard

GUARDED HEAVY-DUTY GAS SPRINGS

- Heavy-Duty Gas Springs provide 70 lbs. of pressure for easy lifting of lid
- Gas spring guards ensure long-term durability

SELF-ALIGNING LATCH HOOPS

- Hoops cannot be bent or pried out of lock system
- Hoops pivot from side-to-side to engage the Gear-Lock® System
- Guarantees a tight seal first time—every time

BOLSTER-REINFORCED RSL™ RIGID STRUCTURE LID

- High-strength RSL® Laminated 3-Layer Rigid Structural Lid provides superior strength, security, and durability
- RSL® Lid is reinforced with two full-length bolsters

PUSH BUTTON LOCK

- End-mounted push button locks provide easy access
- Box can be locked and unlocked from either side

GUARDED THREE-POINT LOCKING SYSTEM

- Lock system engages body in three points to create a tight seal and excellent pry-resistance
- Steel lock cover protects lock system and reinforces the high-strength door

HIGH STRENGTH, QUICK- RELEASE DOOR CABLES

- High-strength, coated, galvanized steel cables support 300 lb. load
- Quick-release feature allows door to drop all the way down for easier access

BULB-SHAPED WEATHER STRIPPING

- Surrounds door or lid to seal out moisture and dust, keeping contents and box protected

JOBBOX TRUCK STORAGE >>>>>

GEAR-LOCK™
 LOCKING SYSTEM

- Ratcheting action pulls lid tight to resist over 1,000 lb. of prying and pulling force
- Provides a high level of security and moisture resistance
- Self-adjusting dual rotary lock system is covered by a heavy-duty guard

RSL™ RIGID STRUCTURAL LID

- High-strength RSL® Laminated 3-Layer Rigid Structural Lid provides superior strength, security, and durability

GUARDED GAS SPRINGS

- Provide easy lifting of lid
- Gas spring guards ensure long-term durability

SELF-ALIGNING LATCH PINS

- Pins pivot from side-to-side to engage the Gear-Lock® System
- No adjustment is required

PUSH BUTTON LOCK

- End-mounted push button locks provide easy access
- Box can be locked and unlocked from either side

QUICK-RELEASE DOOR CABLES

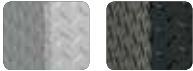

- Quick-release feature allows door to drop all the way down for easier access

STAINLESS STEEL ROTATING T-HANDLE

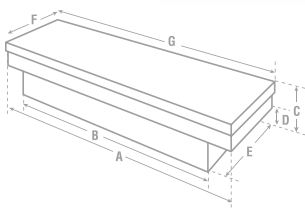

- T-Handles have reinforced cam locks and are sealed to prevent moisture from getting inside

ALUMINUM SINGLE LID CROSSOVERS

JOBBOX Professional is the ultimate in truck storage security and capacity. Single Lid provides the best access to the entire inside of the box, and more easily accommodates large and long items. The Rigid Structure Lid (RSL) has two layers of aluminum joined with rigid foam, plus additional full length bolsters for superior strength and rigidity. Plus, users now have increased visibility with the new lower profile design.

JOBBOX Aluminum Innersides utilize the same Gear-Lock™ System, Self-Centering Latch Pin, RSL™ Lid and High-Strength Body Design as the Crossovers. They mount on top of the bed sidewalls and are ideal for storing longer tools and equipment. Innersides help keep the bed free for storing bulky items. Combine Innersides with a Crossover to create a wrap-around storage system.

Includes Support Legs and Mounting Kit

ALUMINUM TOPSIDES

JOBBOX Professional Aluminum Topside Boxes provide superior security and easy access. Topsides mount on top of the side walls to keep the bed free for bulky cargo. 3-Point locking system locks each door at the top and sides for greater security. Tall 12" door openings provide easy access to larger items, while the heavy-duty construction ensures long-term durability.

Includes Mounting Kit with Support Legs and Hardware

-  Quick Release Coated Cable
-  High Strength Door Cables
-  Push Button Lock
-  Drill Resistant Push Button Locks
-  3-Point Locking System
-  Rotating T-Handle
-  Bulb Shaped Weatherstripping

ALUMINUM & STEEL CHESTS

For unobstructed rear visibility and maximum storage space, chests are the best choice. These JOBOX Professional Chests are the toughest, most full-featured chests we make. The Gear-Lock II™ Rotary lock system self-aligns and ratchets the lid firmly against the weatherproof seal, providing resistance to prying and pull force of over 2,000 pounds.

STEEL UNDERBED BOXES

-  Quick Release Coated Cable
-  High Strength Door Cables
-  Push Button Lock
-  Drill Resistant Push Button Locks
-  3-Point Locking System
-  Rotating T-Handle
-  Bulb Shaped Weatherstripping

JOBBOX Steel Underbed Boxes are built for protecting heavy tools and equipment in the toughest conditions. Durable weather stripping forms a tight seal to prevent moisture from entering. 3-Point Locking System draws the door tight against the weather stripping surrounding the door opening, and locks the door at the top and on both sides.

14-Gauge Industrial Grade Steel Construction

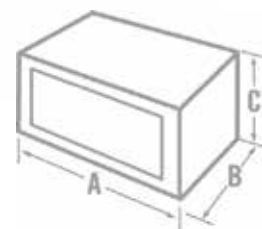

V-Groove Door Frame and beveled edge door create tight seal

Hinge Design Allows door to drop down when cables are detached

Lock Guard Reinforces the door for incredible strength

3-Point Locking System with Drill Resistant Lock

ALUMINUM DRAWER STORAGE

JOBBOX Professional Aluminum Drawer Storage is perfect for use in service vans, minivans, SUV's or motor home basements. Removable dividers allow for segmenting small and large tools, supplies, or parts. Heavy-gauge aluminum is light enough for easy mobility and transport, and durable enough to stand up to heavy loads on top of, and in, drawers.

- Extruded Heavy-Duty Drawer Glides support up to 75 lbs. per drawer
- Pins prevent the drawers from rolling off the glides
- Latches automatically lock the drawers when closed
- Moveable Dividers to create different size bins

0.125" Aluminum Tops
Support up to 200 lb. load
per square foot

STEEL TRANSFER TANKS

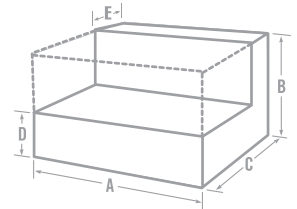

JOBBOX Professional Tanks feature 14-Gauge construction for long-term durability. Internal baffles reinforce the high-strength design and control the flow of the contents when moving. Model 498000 and 498002 Transfer Tanks are made for short bed trucks — including trucks with 4-door cabs. The unique design has extended sides above both wheel wells to increase the capacity. All tanks are pressure tested for leaks.

Center Baffles

PRO II™ INDUSTRIAL-GRADE LADDER RACKS

PRO II Ladder Racks are made for superior load-carrying capacity and long-term durability with swaged joints and large gussets on the cross bars. They are extra-long, providing control for heavy loads and have a 1,700 lb. capacity. They also provide better protection for the cab roof and windshield.

- Made of High Tensile-Strength 2" Diameter Steel Tubing
- Removable Fourth Cross Bar Keeps Heavier Loads from Sagging
- Rear Cross Bar is Removable for Loading Taller or Bulky Cargo
- Smooth, Round Components Reduce Wind Noise and Resistance
- Yellow Zinc Dichromate Undercoat and Marine-Grade Powder Coat Epoxy Finish
- Four Standard Mounting Plates
- A complete PRO II Ladder Rack requires ordering a Side Channel Kit and a Leg & Cross Bar Kit, see below for fitment guide

Truck Type (Without Camper or Utility Shell)	Truck Model	Year	Side Channel Kit Cat. No.	Leg & Cross Bar Kit Cat. No.
Fullsize Stand. Cab Trucks - Long or Short Bed Racks	All Ford F Series, Silverado, Ram, Sierra & Tundra	All	S04000	L01000

Fullsize Crew Cab - Short Bed Racks	F250 & F350	1999 & Up	S06010	L01040
Fullsize Crew Cab - Short Bed Racks	Silverado, Sierra & Ram	All	S06010	L01000

*Note: Short Bed Applications Simply Require Cutting To Shorten Upper Side Channels

** Note: 2002 & Up Ram Requires Cutting Of S06010 Upper Side Channels. Does Not Effect Strength

PRO III STEEL ADJUSTABLE LADDER RACKS

The 1,000 lb. capacity PRO III Ladder Racks have legs that are easily positioned to fit trucks with short or long beds, and with standard, extended, or four-door crew cabs. No cutting required. The height of these racks can be easily raised to fit trucks with taller cabs.

- Rugged 14" Long Mounting Plates Distribute Load Over a Large Area
- Removable Rear Cross Bar for Improved Access to the Bed
- Rear Grab Handles Improve Loading and Unloading Safety
- Optional No Drill Clamp-On Mounting Plates
- Fourth Cross Bar Available for Support of Long Cargo on L80000
- Yellow Zinc Dichromate Undercoat and Marine-Grade Powder Coat Epoxy Finish

Catalog No.	Size	Approx. Shipping Wt.
L80000	155 in Long Ladder Rack Fits ALL Fullsize Trucks	150.0 lb
L80020	142 in Long Ladder Rack Fits ALL Mid-Size and Compact Trucks	140.0 lb

PRO IV ALUMINUM ADJUSTABLE LADDER RACKS

Swaged joints and fully gusseted crossbars for superior load capacity make the PRO IV Aluminum Ladder Rack a perfect choice. The rack has triple-plated fasteners with chrome plating over double nickel plating.

- Rugged 14" Long Mounting Plates Distribute Load Over a Large Area
- Removable Rear Cross Bar for Improved Access to the Bed
- Rear Grab Handles Improve Loading and Unloading Safety
- Optional No drill Clamp-On Mounting Plates
- Fourth Cross Bar Available for Support of Long Cargo on L80000
- Yellow Zinc Dichromate Undercoat and Marine-Grade Powder Coat Epoxy Finish

Catalog No.	Size	Approx. Shipping Wt.
L90000	Aluminum Fully-Adjustable Ladder Rack Fits ALL Fullsize Trucks	95.0 lb

QUICK PAC REMOVABLE LADDER RACKS

Quick Pac Racks are easy to insert in the mounting bases when needed, and easily lifted out of the bases until needed again. The side-mounted racks support 250 lb. and are ideal for occasional use or when a full-length or heavier-duty rack is not required.

- Easy-to-Install Removable Racks for Carrying a Ladder, Lumber or Other Long Material
- Support Arms Adjust From 18" to 32" in Width
- Yellow Zinc Dichromate Undercoat and Marine-Grade Powder Coat Epoxy Finish
- High-Strength Mounting Bases fit in any truck and can be used on either side
- 1-1/4" Square Steel Uprights have fully welded joints

Catalog No.	Size	Approx. Shipping Wt.
L30090	Removable Side Ladder Racks	60.0 lb

FREE-STANDING ECONO LADDER RACKS

Econo Racks can be used as a pair for extra support, or free-standing to provide easy side access to bulky cargo. Long mounting plates provide stability without horizontal connecting bars. Can be paired with Window Guard A31090 to create Free-Standing Fullsize Cab Guard.

- High-Strength 2" Diameter Steel Racks Support up to 500 lb.
- Cross Bar Height can be set at 23-1/2" or 26-1/4" above the bed
- Rack width adjusts from 53" to 68"
- 14" Long Heavy-Duty Bolt-On Mounting Plates
- Yellow Zinc Dichromate Undercoat and marine-Grade Powder Coat Epoxy Finish

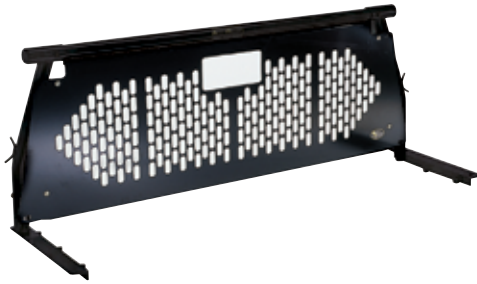

Catalog No.	Description	Width	Height	Approx. Shipping Wt.

A31600	12.0 lb

HOW TO MEASURE YOUR TRUCK

The following instructions generally work well when measuring a full-size truck. Mid-size and Compact trucks have a variety of truck bed configurations which increase the difficulty in measuring the truck and comparing it to the dimensions of a specific truck box. In nearly all instances, the Fitment Guide (pages 36 and 58) will provide accurate information unless the truck is a new model introduced after August, 2015.

THE TRUCK BED NEEDS TO BE MEASURED FOR TWO REASONS:

- A. To Determine that the Truck Box will be long enough to be properly mounted on the truck bed rails.
- B. To Determine whether or not the truck wheel wells will interfere and prevent proper mounting of the truck box.

A: Determining that the truck box is long enough to be properly mounted:

Measurement 1: Width between the top of the bed sidewalls. Dimension "A" of the crossover Truckbox needs to be at least 3" greater.

B. Determining whether or not the truck box will clear the wheel wells in the truck.

Need to find POINT "X" in the truck bed:

Preparing to take Measurements 2 & 3 to find a point "X" in the truck bed to ensure that the truck box will fit your truck:

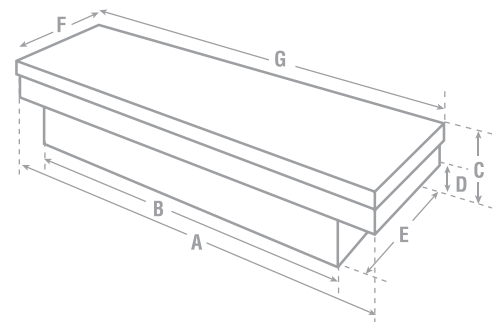

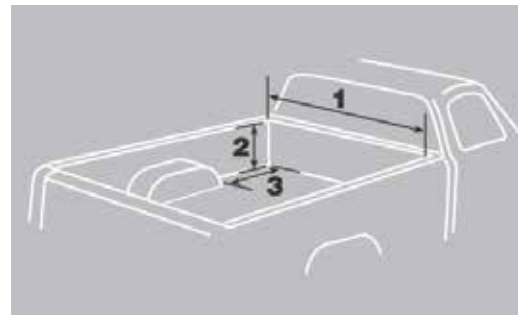

- The depth of the truck box may restrict its fit in the truck because the wheel well might be in the way.
- Except for "Extra-Wide" truck boxes, most truck boxes will require 20-1/4" of horizontal space from the cab bed rail to the point where the Truck Box might hit the wheel well or the truck bed liner.

Measurement 2: A "Standard" Truck box will usually have a 9" Vertical depth below the top of the truck bed rail. A "Deep" model will usually be 12" below the top of the bed rail.

- Determine how deep a truck box you need and measure down from the top of the rail and create an imaginary, HORIZONTAL line at the depth of the truck box you need...usually 9" or 12" below the top of the truck bed rail. This is called Dimension "C" on the truck box.

Measurement 3: Find Point "X" which is on the horizontal "Imaginary Line" below the truck rail (from #2 above). On the horizontal "Imaginary Line" measure to find a point 20-1/4" away from the front truck bed rail (This measurement is from the Cab Truck Bed Rail Towards the Tailgate). The 20 1/4" is roughly Dimension "E" on the truck box and represents how much space the truck box will take in the bed behind the truck cab. After finding Point "X" in your Truck Bed....will the truck box fit?: Again, Point "X" is 20-1/4" away from the front truck cab rail on the Imaginary Horizontal Line (from measurement 2) If point "X" does not hit the wheel well, the truck box will fit. If point "X" hits the Wheel Well, you must make another measurement:

- Mark Point "X" on both wheel wells or the wheel well bed liner
- Measure the distance between the two point "X"s on the truck bed. This dimension must be greater than Dimension "B" on the Truckbox
- If Dimension "B" on the truck box is GREATER than the distance between both point "X"s, the truck box will hit the wheel well or bed liner and you will usually need to select another truck box or mount the truck box with a spacer above the bed rail.

PRODUCT WARRANTY INFORMATION

JOBEX Products Limited Warranties

This product warranty is made by Apex Tool Group, LLC (ATG) to only the original purchaser and it is valid as indicated in the table below from date of purchase, upon presentation of the original sales receipt at the time the warranty claim is made. ATG warrants its product to be free from defects in materials and workmanship at the time of the sale. This warranty does not cover damage caused by accident or unreasonable or unintended use of the product. Modification, disassembly and/or reassembly of the product will invalidate this warranty. Damage to the contents of the box, vehicle or other consequential damages of whatever kind are hereby excluded from this warranty. Use only parts or accessories supplied by Apex Tool Group, LLC. Parts or accessories from other manufacturers or suppliers could alter the function and safety of the product(s) and void this warranty.

KargoMaster Ladder Rack Lifetime Frame Warranty

KargoMaster, Inc. extends to the original purchaser of a KargoMaster product a Lifetime Frame Warranty. If the rack cracks, bends, buckles, or structurally fails in any way, KargoMaster, at its option and expense, will replace or repair the rack. For details, see the Installation Instruction Booklet included with the rack or contact Customer Service.

To Obtain Warranty Service:

In the case of a nonconforming product, you should return the product to the place where it was purchased. The seller will consult with ATG and then either repair or replace the product, at ATG's sole option, if it is determined that the product is defective in either material or workmanship. Please have the following information available to request keys, gas springs or replacement parts:

- The Key Code stamped on your key or the outside cover of the lock cylinder
- The Model Number on the label on the barrel of the gas spring
- For other replacement parts, the Model Number of your product

To obtain parts, call our Customer Service Department at the number below between 8:00 AM and 5:00 PM Eastern Standard Time Monday through Friday. Press 1 when prompted. To send an e-mail, use the address below.
