

Triple Seal Door Sweep Installation Instructions and Warranty

You will need: Measuring tape, hacksaw, screwdriver and/or drill

Step 1:

Measure bottom of the door and mark length on door sweep. Trim excess with hacksaw.

Step 2:

Position door sweep at the inside bottom of the door, adjust and mark height and screw holes on door. For best results, the seal of the door sweep should rest slightly against the threshold or floor.

Step 3:

Attach door sweep to the door bottom using the screws provided. Drill pilot screw holes first if necessary.

Product Warranty:

This product is warranted to be free from defects in material and workmanship for one year. For replacement product, contact customercare@amconservationgroup.com and have proof of purchase available. Manufacture may require original product to be shipped back for evaluation and/or pictures of defective product to be provided.
