

## **Brown Jordan Care & Maintenance**

Fine outdoor furniture deserves exceptional care. Brown Jordan furniture can be enjoyed for many years when well maintained.

### REGULAR MAINTENANCE

Wash the furniture with a solution of mild detergent and water, rinse with clear water, and dry thoroughly. To all metal frames, apply a fine, clear automobile wax for maximum protection against harmful ultraviolet exposure and salt air.

For best protection, perform this maintenance two or three times per year in low pollution areas or more frequently in high pollution areas. Please note that these durable materials can be safely cleaned as often as desired. Note: Some suntan and sun block products may be harmful to resin, cushions and and strap. Do

not allow such products to come in contact with any seating surfaces to avoid deep penetrating stains, which are not covered under warranty.

### HOW TO MAINTAIN & CARE FOR RECLINER GAS CYLINDERS

Reclining pieces with gas cylinder mechanisms are designed to operate smoothly for years when correctly maintained. The piston should periodically be cleaned with a soft cloth to remove dust and dirt. More stubborn stains can be removed by carefully buffing with 1000+ grit sand paper.

### HOW TO CLEAN & CARE FOR TEAK FURNISHINGS/COMPONENTS

Left alone to age, the natural color of teak furnishings/ components will weather to a soft, silver grey. This process will take approximately nine months, depending on the degree of sunlight and rain exposure. Imperfections, which are inherent properties of the wood, will show over time, enhancing the beauty of the furniture. In humid or wet climates, or after rains, the wood may naturally expand and contract, causing the grain to rise. This is to be expected with exposure to the elements and will stabilize after the initial weathering occurs.

To maintain teak furnishings/components, care should be taken not to scratch or damage the protective coating. Cleaning products which contain alkaline or acid should not be used. For stains, the wood may be washed with a mild solution laundry detergent and water, then rinsed thoroughly and allowed to dry completely. Oiling the wood may cause

mildew or irregular coloring.

#### HOW TO CLEAN WOVEN FURNISHINGS

Woven furnishings are made of durable and weather-resistant extruded polyethylene resin weave. Light stains and soils may be removed with a solution of mild detergent and water, rinsed with clear water and dried thoroughly. Mildew and heavy stains can be removed with a quality commercial outdoor furniture cleaner and protectant. Woven furnishings may not be suitable for intensely hot climates.

#### HOW TO CLEAN FABRIC

Fine outdoor fabrics are designed to endure years of sun, soil and moisture. Wash outdoor cushions with a solution of mild detergent and water and thoroughly rinse with clear water. Stand cushions on end and allow to air dry completely. Light stains can be removed as above. Mildew and heavy stains can be removed with a quality commercial outdoor furniture cleaner and protectant. Note: Do not dry clean or use a washing machine or dryer. Do not steam or use water at temperatures above 100oF when washing.

Note: Be careful to keep the cleaner from contact with the cushions of your Brown Jordan furniture, as it will cause discoloration. Do not use bleach on fabrics. Do not use solvent-type materials on woven vinyl, woven blend or ultra woven blend fabrics as they will damage the yarns. Do not use chlorine based cleaners.

#### HOW TO CLEAN & CARE FOR STONE & MARBLE TOPS

Brown Jordan tabletops are designed for normal outdoor use in residential settings. To maintain the natural beauty we recommend applying a stone-enhancing sealer every six months to protect and restore the top. This step can be repeated each year and before the winter season.

If tabletop is stained with products such as wine, soda, coffee, or other colorants of organic origin, clean these spills immediately with a mild detergent then rinse with water.

In extreme cold climates, it is recommended that tabletops be stored in a dry indoor area or be covered with suitable outdoor furniture cover. Be sure to allow space between the tabletop and the cover so that moisture does not collect on the table; this will promote airflow and allow moisture to escape.
