90° RIGID Bends...
IN UNDER 10 SEC.

REDUCE RISK
OF INJURY

Portable Cyclone® Powered Rigid, IMC, and EMT Conduit Bender

The first option for bending 1/2" to 1" conduit that doesn't break your back or wallet!

Introducing the innovative new Portable Cyclone® powered conduit bender for bending 1/2" – 1" Rigid, IMC, EMT, Rigid aluminum, & EMT aluminum conduit and 1/2" – 3/4" PVC-Coated Rigid conduit, all on a single shoe! The bender uses a standard pipe threader as a power source, making it versatile and quick to set up with a common jobsite tool. It is compatible with most pipe threaders on the market. The Portable Cyclone® is designed with portability in mind. Weighing in at just 35 lbs (about 53 lbs* with a pipe threader attached), this bender is easy to carry around on a jobsite or up and down stairs. Reduce the risk of injury by removing the need to bend larger sizes of conduit using a hand bender or lugging around heavy equipment and conduit. Make work more efficient by saving time on the jobsite. Performing precise bends with repeatability has never been this quick and easy! Get all this at a competitive price versus similar mechanical benders on the market. Available in February 2020.

Make accurate bends with easy to read angle decal.

Pipe threader serves as the power source for bending.

Portable Cyclone® can also perform horizontal bends.

WEIGHT	Portable Cyclone®	35 lbs.
	Portable Cyclone® with Power Driver	53 lbs.*

**Weight may vary depending on type of threader being used.*

Features:

- Bend 1/2" – 1" EMT, IMC, and Rigid conduit on a single shoe – no spare parts to carry around.
- Make precise bends with easy repeatability
- Bend conduit vertically or horizontally
- Reduce risk of injury trying to bend larger sizes of conduit or lugging around heavy equipment.

1 YEAR WARRANTY

CONDUIT BENDING CAPACITY

		Size		
		1/2"	3/4"	1"
Type	EMT	✓	✓	✓
	Rigid	✓	✓	✓
	PVC-Coated Rigid	✓	✓	
	IMC	✓	✓	✓
	Rigid Alluminum	✓	✓	✓
	EMT Aluminum	✓	✓	✓

Purchase the Gardner Bender PT200 Power Driver or use your own pipe threader. Includes a durable blow mold carrying case. 1/2" – 2" Threader Dies are also available. The Portable Cyclone® is also compatible with most pipe threaders on the market including Ridgid® or Milwaukee® threaders.

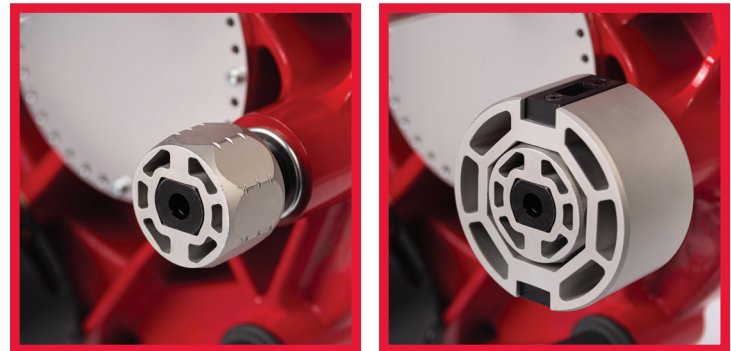

Single shoe design for bending multiple conduit types - no loose parts.

Pipe threader serves as the power source for the bender.

Quickly repeat bends with the easy to read angle decal.

Durable leg stand extends to provide stability.

Portable Cyclone® is compatible with 11-R and 12-R die headed threaders.

Easily transport the Portable Cyclone® by the 3/4" legs.

Angle lever to adjust the angle of the Portable Cyclone® up to 20°

Create a stand using 3/4" conduit by unscrewing the Portable Cyclone®'s legs.

ACCESSORIES:

- A pendant controller is included to make accurate bends with easy operation.
- An optional bender carrying case available for purchase.
