

Stainless Steel Bathroom Sinks

For best results, keep the following in mind when caring for your KOHLER® product:

- Always test your cleaning solution on an inconspicuous area before applying to the entire surface.
 - Wipe surfaces clean and rinse completely with water immediately after applying cleaner. Rinse and dry any overspray that lands on nearby surfaces.
 - Do not allow cleaner to soak.
 - Use a soft, dampened sponge or cloth. Never use an abrasive material such as a brush or scouring pad to clean surfaces.
 - For warranty information call 1-800-4KOHLER (1-800-456-4537).
* Success with cleaners and procedures is dependent upon such factors as the hardness and temperature of the water, using exact measurements of ingredients, changes in cleaning formulas and the condition of the product being cleaned. Since there are variations within these factors, Kohler cannot guarantee the effectiveness of the formulas.
-

- Clean stainless steel once a week.
- Always apply stainless steel cleaner/polish with a nonabrasive cloth or sponge, working with, not across, the grain.
- Cleaners containing chloride are not recommended. If used, rinse the surface immediately to prevent corrosion.

- Stainless steel bathroom sinks with colored finishes require special care and cleaning. Use only a mild detergent (such as dishwashing soap and water) for cleaning.

Success with cleaners and procedures is dependent upon such factors as the hardness and temperature of the water, using exact measurements of ingredients, changes in cleaning formulas and the condition of the product being cleaned. Since there are variations within these factors, Kohler cannot guarantee the effectiveness of the formulas mentioned.

Care Tip

Allowing water to evaporate on metal will form water deposits. To avoid this, it is important to use a dabbing action to dry metal, not an abrasive or rubbing action. Cleaning with a damp sponge and buff drying should keep your product looking beautiful.
