

CAMP 20 Acacia Deck Tile One-Year Warranty

Interbuild® offers a one-year limited warranty on its acacia deck tiles against factory faults, such as the delamination of the acacia glue joints or the de-coupling of the plastic installation base, which should not occur. Any warranty claims for factory faults must be made prior to installation.

Prior to installation, Interbuild recommends that the deck tiles be finished with at least two coats of an Exterior Grade Wood Sealant, such as Interbuild's Hardwax Clear Wood Oil on all tile surfaces. Future maintenance of the deck tiles may require additional coats of wood sealant as a result of weatherization.

If the recommended finishing and maintenance instructions are not followed, then Interbuild is not responsible for any faults that may occur in the future, such as cracked wood, bowing wood or deformed wood.
