

Firewood that is kept dry and seasoned is the easiest, cleanest and safest wood to burn while ensuring you get the maximum BTU output for your home. Protect your firewood from the most extreme conditions with this Shelter Brand "slider" log rack cover by HY-C Company. This cover is designed to cover the top rows of wood and slides down as wood are used allowing for additional ventilation and improved air circulation around your wood. The cover is made with heavy-duty vinyl for years of protection from rain and snow. For easy access to the firewood on your rack, the cover is designed with hook and loop strips along the front corner edges to allow the front flap to be opened and then securely closed. Steel grommets have been added in order to tie the log rack cover down in cases where high winds can blow the cover off your dry, seasoned wood.

- Heavy-duty vinyl construction
- Front flap opens for easy access to the wood
- Hook and loop fastener strips allow the front flap to be securely closed
- Steel grommets to tie cover down
