

FRONT: 9' 10 7/64"
SIDE: 7' 4 31/32"
HEIGHT: 6' 10 43/64"

We thank you for choosing an Australian Made Shed. For further assistance please visit our detailed instructional video library at

www.abscosheds.com.au/USA

At ABSCO Industries we are always looking to be number ONE, so please let us know what you think of our instructions. Feedback makes us better.
feedback@abscos.com.au

GENERAL INSTRUCTIONS

Before commencing any assembly, read through these instructions in detail to gain a thorough understanding of assembly methods and associated details.

Unpack the carton and carefully identify and check off all the parts against the parts described and illustrated on pages three and four.

SITE PREPARATION

The site for the shed must be level.

It is recommended that the shed be set on a 4" concrete slab and anchored down appropriately (refer last page for details).

Anchor sets are not supplied as standard items with this product.

TOOLS REQUIRED

Normal 1/8", 11/64"

OPTIONAL

Normal 25/64"
Masonry 25/64"

A NOTE ON SAFETY

Some parts may have sharp edges. It is advisable to wear gloves when handling these items and safety glasses if drilling holes. Sensible shoes are highly recommended.

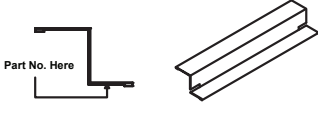

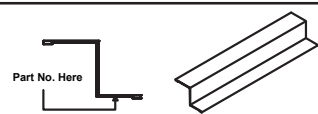

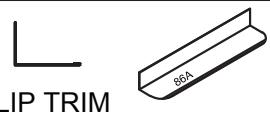

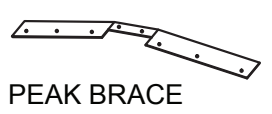

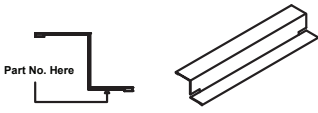

Do not erect your shed in windy conditions, ensure that the shed is securely anchored to a solid foundation immediately after construction is completed.

It is highly recommended to erect the shed with two or more people.

INSTRUCTIONS FOR JOINING SPLICED CHANNELS

NOTE: THE TEXT MARKED ON ALL PARTS MUST BE SHOWN ON THE SAME SIDE AS EACH OTHER.

STEP 1.

Position the channels and the CSJ so the center of the CSJ is in line with the end of each channel to be joined together.

STEP 2.

Join the first channel to the CSJ by inserting the center of the CSJ (on an angle) to the end of the channel where the JOIN>> text is marked. Push down one side of the CSJ until you hear a 'click'.

STEP 3.

Join the second channel to the CSJ by positioning the <<JOIN end of the channel at the center of the CSJ (on an angle). Push the CSJ into the channel until you here a 'click'.

FINISHED CHANNEL

The joined channels should now look like the picture above with the CSJ positioned equally inside of the joined channels.

DRILL 4 x 1/8" (2 PER SIDE) HOLES TO SECURE SECTIONS TOGETHER. (THESE SCREWS MAY HAVE TO BE TEMPORARILY REMOVED AND REPLACED DURING LATER ASSEMBLY)

STEP 1. PRE-ASSEMBLY OF SPLICED CHANNELS

NOTE: JOIN TOGETHER 20 X CHANNEL SECTIONS USING 10 X CHANNEL JOINERS (PART CSJ)

NOTE: SOME CHANNELS HAVE HOLES IN THEM - YOU WILL NEED TO RE-DRILL HOLES ON ANY CHANNEL WHERE THE CSJ JOINING CHANNEL COVERS HOLES ON THE CHANNELS YOU ARE CONNECTING

INSTRUCTIONS FOR JOINING SPLICED RIDGE BEAM

STAGE 1: PUSH RIDGE BEAMS TOGETHER, MAKE SURE THERE IS A 2" OVERLAP OF THE RIDGE CAP

INSTRUCTIONAL
VIDEOS

**STAGE 2: INSERT RIDGE CAP JOINER INTO CONNECTED RIDGE CAPS.
MAKE SURE JOINER HAS 8 55/64" IN EACH RIDGE CAP.**

ENSURE RIDGE BEAM JOINER IS FLUSH

2"

**STAGE 3: TURN RIDGE CAP OVER AND MEASURE 9 27/32" FROM THE END OF EACH RIDGE CAP.
PLACE TEK SCREWS IN 2" INCREMENTS FROM SAID END.
REPEAT THIS PROCESS FOR THE OPPOSING HALF OF RIDGE BEAM**

PLACE 4 TEK SCREWS EVERY 2"

**REPEAT TEK SCREW PROCEDURE
FOR OPPOSING SIDE**

STEP 2. PRE-ASSEMBLY OF SPLICED RIDGE BEAM

ABSCO ASSEMBLY INTRODUCTION

The snaptite assembly system locks most perimeter channels to all roof and wall sheets without the need for tools and fasteners.

To pre-assemble the four wall panels and two roof panels, the perimeter channels are secured to the top and bottom of each panel using the snaptite system, as detailed on the following pages wherever you see the symbol.

After joining sheets together, position channel over one end of the sheets, gently tapping it over the snaptite lugs, working along the sheets to the other end.

Position sheets on timbers, trestles or partly over edge of concrete slab.

Each perimeter channel must finish flush with the edges of the sheets. The snaptite system allows adjustment for this process by simply tapping the channel along the sheets until each end is neatly flush. If you need to remove channels from the panels, pull the channel along the panel from opposing ends. You may need someone to help with this.

FASTENING SYMBOLS

Join components together by pre-drilling the holes first. Use one component as a template to mark where the holes are. Drill with 3mm drill bit.

Join components together with one screw at this location only, as some channel sections have extra holes that are not required for this model of garden shed

Do not join components together at this location yet, as the screw may obstruct further assembly of other components

POP RIVETS

NUT & BOLT SET

DOOR PANEL ASSEMBLY

ATTACH 58A AND 58B TO SHEET B SO THAT THE 25/32" SIDE OF THE CHANNELS ARE ON THE OUTSIDE OF SHEET B

INSTRUCTIONAL
VIDEOS

REAR PANEL ASSEMBLY

ATTACH 55B AND 81B CHANNEL WITH NOTCHED END AS SHOWN

SIDE PANEL ASSEMBLY

(2 Required)

INSTALL PEAK BRACE WITH OVERHANG FITTING INSIDE SHED

ATTACH 81C, 83L AND 83R CHANNEL AS SHOWN

INSTRUCTIONAL
VIDEOS

ROOF PANEL ASSEMBLY

(2 Required)

LAY SHEETS OUT AS SHOWN

FRONT PANEL ASSEMBLY

LAY SHEETS OUT AS SHOWN

INSTRUCTIONAL
VIDEOS

DOOR PANEL ASSEMBLY

NOTE: Nuts and bolts (supplied) may be used instead of pop rivets (supplied) by simply enlarging the hinge hole sets in the jamb using a 5/32" drill bit

NOTE: The two holes required to connect the padbolt hasp for each door have not been pre-punched, to allow for proper alignment. position each hasp centrally over the padbolt shaft, and secure with screws. The sheet metal screws supplied have the ability to self drill through the channel, use a continuous firm pressure and high drill speed and the screws will penetrate the sheet metal. If necessary a 3mm drill bit can be used.(1/8")

PANEL CONSTRUCTION

NOTE: Take care to ensure that both front and rear wall panels are not positioned upside down. the top channel of each panel is pre-punched for attaching roof sheets to, the bottom channels are not.

ROOF CONSTRUCTION

Slide the roof panel into position, and secure with one screw at each corner only at this stage

FINAL CONSTRUCTION

ANCHORING OF SHED

- EACH ANCHOR CONSISTS OF ONE NUT, BOLT, DYNABOLT AND STEEL ANGLE
- DRILL A 25/64" HOLE INTO THE WALL SHEET
- DRILL A 25/64" HOLE INTO THE CONCRETE

EXPORT PRODUCT WARRANTY AGAINST DEFECTS

Congratulations on your purchase of an ABSCO SHED

ABSCO SHEDS, including garden sheds, garden beds, aviaries, storage units, garages, awnings and carports are made using high quality Australian made steel.

We are pleased to advise we warrant that the steel coating will not rust, crack, flake peel or blister for 12 years from date of purchase.

This warranty does not apply to surface deterioration of panels caused by 'Swarf' (Tiny particles of steel debris left from cutting, grinding or drilling operations) that has not been removed after building construction, or as a result of contact with damp soil, chemicals, fertilisers or other corrosive substances.

This warranty covers any Absco product used for normal domestic use and installed in accordance with the installation instructions.

This warranty does NOT cover Damage caused by storms, wind, rain, snow or poor foundations.

This warranty does NOT cover ABSCO products installed in severe coastal, industrial or other highly corrosive environments. The warranty does not cover fasteners (screws, nuts, bolts, rivets, hasps or sliding padbolts).

The warranty is limited to replacement and delivery of components and does not include any labour or installation costs. The benefits given by the warranty are in addition to your other rights and remedies under a law in relation to the goods or services to which the warranty relates.

In the unlikely event a warranty claim is made, it must be supported by photographic evidence and details of the defect, including component part numbers, together with proof of purchase documentation (or on-line registration of purchase) and forwarded to the address below. Upon receipt of the warranty claim, the Customer Service Manager will contact you within three business days to advise you of the assessment outcome of the claim, which may include your expenses incurred in making the claim.

THE CUSTOMER SERVICE MANAGER, ABSCO SHEDS, PO BOX 119 ACACIA RIDGE QLD AUSTRALIA 4110
