### 1 Getting Started

**Inspect Your Entryway for Obstructions:** Check for any obstructions above and around your entryway that may prevent the outward swing of your new security door, and/or its installation, such as: light fixtures, door bell, low overhang, door handle of your existing door, and trees, bushes, or hanging plants.

### 2 Identify or Create Required Mounting Surface

Your new security patio door will require a flat minimum mounting surface of 1-1/2" above, on both sides and below your entry door. In some cases this may require a build out. If a build out is required, install bottom of build out first (**Fig. 1**), making sure it is flush with stoop to avoid creating a tripping hazard. Secure all sides of the build out to studs in the wall.

## PRODUCT MEASURING GUIDE

### 3 Measure for Rough Opening Height and Width

**Measure for Rough Opening Height**

Measure from inside top edge to existing sliding patio door track.

**Measure for Rough Opening Width**

Measure from inside edge to inside edge of existing sliding patio door frame.

**Instructions:**

Determine which fit range your measurements fall within and order that standard size door.

### Standard size door

Door Size Tamaño de la Puerta	* Rough Opening Width Fit Range Anchura de apertura irregular de ajuste	Your Rough Opening Width El ancho de la abertura	* Rough Opening Height Fit Range Altura aproximada de ajuste	Your Rough Opening Height La altura de apertura irregular
72" x 80"	70-1/4" - 73"		79-3/4" - 82-1/2"	
96" x 80"	94-1/4" - 97"
