

INSTALLATION

! The kitchen area should be dry and aired and equipped with efficient ventilation.

When installing the oven, easy access to all control elements should be ensured.

! This is a built-in oven, and its back wall and one side wall can be placed next to a high piece of furniture or a wall. Coating or veneer used on fitted furniture must be applied with a heat-resistant adhesive (215°F). This prevents surface deformation or detachment of the coating.

! Make an opening with the dimensions given in the diagram for the oven to be fitted.

! Make sure the mains plug is disconnected and then connect the oven to the mains supply.

! Insert the oven completely into the opening without allowing the four screws in the places shown in the diagram to fall out.
