

Custom Door & Mirror

Use and Care

Maintenance: Door hinges and rollers should be sprayed every 6 months. For best results use a Silicon or Teflon based lubricant. Use spray very sparingly, a very little goes a long way. You will be surprised at how well the doors will operate with a little lubricant.

Cleaning of Mirror: The most important thing to know about cleaning mirror is to use an alcohol based cleaner. **DO NOT USE AN AMONIA BASED PRODUCT.**

It is also best to spray the cleaner onto the cloth or paper towel and not the mirror. Lint free rags will work best but are certainly not necessary.
