

Product Care & Cleaning

TO PROTECT AND CARE FOR YOUR FURNITURE, WE SUGGEST THE FOLLOWING:

- Rinse or clean with a mild soap or detergent and water solution.
- Harsh acidic and alkaline cleaning solutions should be avoided
- Solvents should be used with care as some may stain the surface. Using any cleaner on a small, less visible test surface is always a good idea if it has not already proved by experience to be safe.
- This chair maybe used indoor or outdoors during any season.
