OSI QUAD MAX NOW AVAILABLE IN CLEAR.

QUAD MAX CLEAR. CLARITY THAT LASTS!

Immediately
after application

Collection
over time

UV Exposure

QUAD MAX Clear

QUAD MAX CLEAR

QUAD MAX CLEAR WILL STAND THE TEST OF TIME AND REMAIN CLEAR EVEN AFTER EXPOSURE TO THE ELEMENTS. IT IS FORMULATED WITH LONG LASTING UV INHIBITORS AND DIRT & DUST RESISTANT POLYMERS THAT PROTECTS CLARITY OVER THE LONG HAUL.

Traditional Hybrid SMP

TRADITIONAL HYBRID SMP

Traditional Hybrid SMP sealants often apply and cure with unwanted colored tints. They also tend to collect dust & dirt and have poor UV resistance.

Traditional Silicone

TRADITIONAL SILICONE

Traditional Silicone sealants apply and stay "cloudy". They are also prone to unsightly dust & dirt collection.
