

A close-up photograph of a person's hands holding a silver, cylindrical showerhead. The showerhead has a textured, knurled surface and a small nozzle at the top. The person is wearing a dark, patterned garment. The background is dark and out of focus.

HOTEL PURE

FREQUENTLY ASKED QUESTIONS

SPEAKMAN®

1. WHAT IS THE HOTEL PURE SHOWER HEAD?

The Hotel Pure Shower Head features the exact same technology, design and performance as our legendary Hotel Shower Head. We completely redesigned its internal components to include an internal filtration system that removes and converts unwanted elements from water. In testing it has also shown to reduce scale buildup and heavy metals.

2. WHAT DOES THE HOTEL PURE ACTUALLY REMOVE FROM MY WATER?

The Hotel Pure's internal filtration cartridge is designed to remove up to 99% of chlorine that can be found in your water.

3. HOW DOES IT WORK?

Our filtration cartridge features a proprietary media blend that collects and converts unwanted elements into pure, clean water. A process that is known as oxidation reduction.

4. WHAT IS THE PHYSICAL BENEFIT OF THE HOTEL PURE SHOWER HEAD?

By removing chlorine and other unwanted elements from your water, the Hotel Pure Shower Head will result in softer, healthier hair and smoother skin.

5. WHAT'S INCLUDED WITH MY HOTEL PURE SHOWER HEAD?

Every Hotel Pure Shower Head includes one replaceable filtration cartridge. Additional replacement filtration cartridges can be purchased separately from Speakman.com.

6. HOW OFTEN SHOULD I REPLACE MY FILTRATION CARTRIDGE?

We recommend replacing your filtering cartridge every 6 months or 10,000 gallons. New filtering cartridges will feature rich, bright gold media. As filtration occurs, that color will begin to dull and darken over time. When the color of the media becomes predominantly dark, it's time to replace the cartridge. Please note that usage of the filter on a well water source can cause the filter to change colors earlier than 6 months, this does not mean that the filter has stopped functioning.

7. HOW DO I REPLACE MY FILTERING CARTRIDGE?

Replacing old filtering cartridges is super easy to do. Simply rotate the middle ring from the locked to unlocked position. Once unlocked, remove the top of the shower head from its base. Next, pop-out the existing cartridge and replace it with a new one. And lastly, assemble the shower head back to its original form and lock the ring in place. Please note that usage of the filter on a well water source can cause the filter to change colors earlier than 6 months, this does not mean that the filter has stopped functioning.

8. CAN I STILL PURCHASE THE ORIGINAL HOTEL SHOWER HEAD?

Absolutely. Our legendary Hotel Shower Head is still one of our most popular models and will be available on Speakman.com for years to come.
