

Lemon Tree

Add the incredibly fresh, citrus scent of lemon blossoms to your home by growing a lemon tree! Extremely fragrant white flowers bloom in spring and summer among attractive, glossy green leaves. As lemons begin to appear and mature, they help to provide visual interest for the remainder of the year.

Lemon trees are self-pollinating, so only one tree is needed to produce fruit. They adapt well to container culture and require transplanting to a larger, well-draining container as needed.

- Plant Type:** Citrus x Limon
- Bloom Time:** Spring-Summer
- Shipped Size:** 12-24" tall
- Mature height:** As desired, by pruning
- Origin:** Product of USA; grown from cultivated stock
- Light:** Prefers sunny location
- Hardiness:** Zones 9-12 outdoors, but will require protection if temperatures fall below freezing; all zones indoors

Care Instructions

Lemon Trees are great indoor and outdoor patio plants.

For best results:

In the Spring: Move your potted tree outdoors into full sun when the threat of frost is past.

In the Fall: Bring your potted tree back indoors before the frost season begins.

For best results, within 4-6 weeks of receiving your tree, transplant it into a larger pot that drains well and is approximately 8-12" in diameter to give the roots room to grow. In

the spring move your potted tree outdoors into full sun when the threat of frost is past. Bring it back indoors in the fall before the frost season begins. Fertilize regularly with high nitrogen formula, 5-3-3 ratio. Water thoroughly while letting the surface soil dry between watering. Do not overwater. Prune by pinching back the tips of new growth toward the interior branches. Remove any new growth or stems near the soil.

Fresh Squeezed Lemonade

- 1 Lemon
- ¼ Cup Sugar
- Crushed Ice
- Water

Place sugar at bottom of 12-16 oz. container with a tight-fitting lid. Squeeze juice from lemon (using a juicer makes it easier to extract all the juice) and pour into glass over sugar. Fill container ¾ full of crushed ice. Add water to fill. Place cap tightly onto container and shake well

Note: Some sugar will remain undissolved at the bottom of the container. Use straw to stir as desired while drinking.
