

# DIRECTIONS FOR 30 SECONDS® OUTDOOR CLEANER

## Concentrate Formula:

Mix 1 part 30 SECONDS Outdoor Cleaner with 1 part water. For example: Mix 1 gallon of cleaner with 1 gallon of water.

## Directions:

Apply 30 SECONDS Outdoor Cleaner when the surface is DRY.

Keep surface wet with the product for at least 30 seconds. The saturation time will vary depending on the amount of build up, and the porosity of the surface.

## ***For example:***

### Concrete, Masonry, Tile, Asphalt:

Spray on DRY surface.

Keep wet with the product for up to 15 minutes.

Hose off thoroughly with water.

### Wood:

Spray on DRY surface.

Keep wet with the product for up to 5 minutes.

Brush or sweep the surface with the grain.

Hose off thoroughly with water.

### Metal, Cloth, Paint, Plastic, Fiberglass:

Spray on DRY surface.

Keep wet with the product for up to 3 minutes.

Brush (if necessary) and rinse thoroughly with water, within 10 minutes.

## In General:

It's optional to brush the surface if necessary, to loosen stubborn build up.

Re-application, prior to rinsing, may be necessary where heavy build up occurs.

Rinse thoroughly with water, using a garden hose. The cleaning action stops when your surface dries.

After use, clean applicator thoroughly with water.

Store in a cool, dry place.

## Helpful Hints:

Always test on an inconspicuous area first, on surfaces that are susceptible to corrosive, dulling and bleaching.

For example: fabric, color paving, high gloss paint and untreated metals.

Wear protective clothing and footwear to prevent bleaching to regular clothing.

Rinse from plants and metals within 10 minutes of application.

Once you are familiar with how well 30 SECONDS Outdoor Cleaner works, it can be diluted up to 4 times more.

Then you keep the surface wet, 4 times as long. Refer to the label directions for more information.
