How to dispose your batteries

Alkaline batteries are not listed as a hazardous waste under the Resource Conservation and Recovery Act (RCRA).

Most states classify alkaline batteries according to RCRA regulations; however, some states have more rigorous regulations. The hazardous waste characterization requirements of Alaska, California, Minnesota, Rhode Island and Washington include bioassay. South Carolina regulates all types of batteries as special waste. Therefore, disposal of alkaline batteries in South Carolina must be accomplished accordingly.

Please call 1-877-2-RECYCLE for information on recycling your used alkaline battery or visit www.call2recycle.org.
