

Use and Care

- + Prepare planting hole by digging a hole twice as wide as the root ball.
- + Loosen up root ball and place plant in the hole; then backfill the sides with a mixture of 1/2 soil from the hole and 1/2 potting soil
- + Top with landscaping mulch to help keep you plant well moisturized
- + WATER immediately after planting
 - + Starter plants & Quart Size: 10-20 seconds per plant
 - + 1 – 2 Gallon plants: 30-40 seconds per plant
 - + 3-5 Gallon plants or larger: 1-2 minutes per plant
