Feel the Difference

TELESTEPS 
No.1 in telescopic work tools

MANY ADVANTAGES

SIMPLE

We have always been convinced that the best ladder is both short and long. The telescopic ladder is easy to pull out to the desired length and securing it before use is just as quick. When the red locking catches have unfolded under each rung, this indicates that the ladder is ready for use and can handle loads of up to 150 kg.

FLEXIBLE

With the telescopic function and the minimal turning radius, the ladders are perfect even in small spaces. The ladders can be adjusted to the optimal height to fit your needs precisely. In this way, a telescopic ladder is many ladders in a single unique ladder. In our assortment there are also smart accessories that make your work even easier.

SAFE & CLASSIC

Safe, functional and easy to take with you – Telesteps does not compromise on anything. The ladder is small and compact for storage and transportation. We assemble the ladders by hand and test them individually before delivery. Our equipment is certified according to EN 131/SP/TÜV.

Here we set the standard for what you should expect from a telescopic ladder - big and small, qualitative and safe with a user friendly touch. This is a product with the result of Swedish design thinking - Simple & User friendly with no compromise in Quality or Safety!

CLASSICO LINE 2,6 M

Art. no:	60226
No. of treads:	8
Tread width:	65 mm
Working height:	3,8 m
Length, extended:	2,6 m
Length, closed:	0,72 m
Width:	0,47 m
