

# # 92751 1.50" x 20 Foot Premium Home Shop Vacuum Hose

The 92751 is a premium commercial vacuum hose ideal for use with most major brands of home shop vacuums. The 92961 is ideal for both wet and dry pick-up. It is not suitable for conveying refined petroleum chemical products like gasoline, kerosene, or motor oils as this will degrade the hose.

The 92751 can be used as a connecting hose between a home shop vacuum and many brands of table saws, routers, drills, and grinders assuming a suitable connector is available for connection from the power tool to the hose.
