Hanging Rod Installation Instructions for CEILING MOUNTING

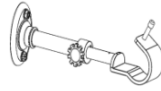

See other side for WALL MOUNTING instructions

Tools Required:

1. Drill with 3/16" drill bit

2. Phillips-head screwdriver

Parts List

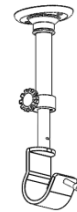

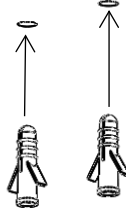

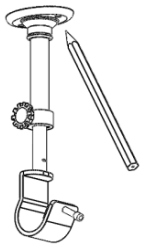

I. Hanging Rod
36-56" 2 tubes
56-108" 2 tubes
108-168" 4 tubes

II. Brackets
36-56" 2 brackets
56-108" 3 brackets
108-168" 3 brackets

III. Wall mount anchors and screws
36-56" 4-anchors; 4-screws
56-108" 6-anchors; 6 screws
108-168" 6-anchors; 6-screws

Bracket Installation

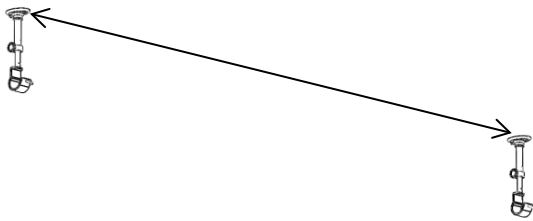

1. Using the bracket as a template, place it in the desired location. Mark holes.

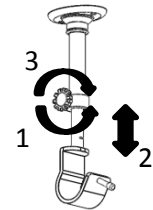

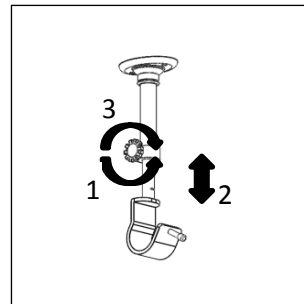

2. Drill 3/16" holes on pencil marks and insert anchors until they are flush with the ceiling.

3. Remove hook from the bracket by loosening the set screw and then screw the bracket to the ceiling.

4. Attach the hook to the bracket. Attached bracket should look like this.

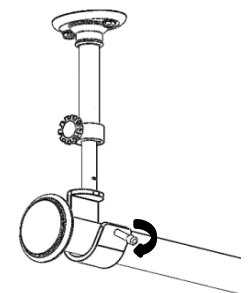

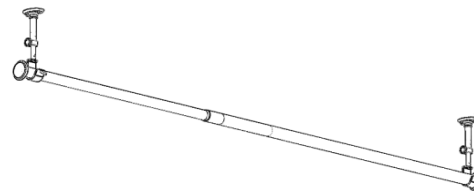

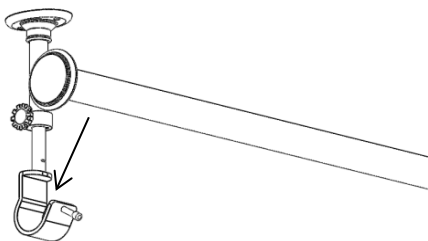

Brackets must align.

5. Install the other bracket in the same way as steps 1-4. Typically, the brackets should be the same distance from the nearest parallel wall.

6. Adjust the bracket length by loosening the set screw counter-clockwise and moving the hanger hook inward or outward and then tighten in clockwise motion.

7. Adjust the other bracket to the same length as 1st and hand-tighten screw.

8. Place the curtain onto the hanging rod (Curtain not shown). Place one end of the hanging rod into one bracket.

9. Place the hanging rod onto the other hanging bracket. (Curtain not shown). For additional support, install the third bracket (56-108" & 108-168" only).

10. Tighten set screws on each bracket to secure the rod.
