

PLANTING SPECIFICATIONS

PLANTING RATE:

New Lawns: 10 lbs./1,000 sq. ft.

Overseeding: 5 lbs./1,000 sq. ft.

This package covers:

5,000 sq. ft. new lawns

10,000 sq. ft. overseeding or reseeding existing lawn

Planting Depth: 1/4"

Germination Time: 7-14 Days

Traffic Tolerance: Very Good

Sun Tolerance: Good

Shade Tolerance: Medium

Drought Tolerance: Moderate

Recommended Mowing Height: 3"

SETTINGS FOR COMMONLY USED SPREADERS

Spreader	Regular Overseeding	New Lawn Seeding
Republic EZ Drop Spreader	20	30
Republic EZ Broadcast Spreader	7½	10½
Scotts AccuGreen Drop Spreader	12½	17
Scotts EasyGreen	30	30*
Scotts SpeedyGreen Broadcast Spreader	12½	14½

*Go over twice

ADDITIONAL TIPS

- Conduct a soil test to determine pH level and add soil amendments accordingly for optimal lawn development.
- Begin mowing once turf reaches one-third taller than desired mowing height.
- Do not apply weed control herbicides until after the third mowing.
- Once turf is established (4-6 weeks after planting), begin an annual fertilization maintenance program.

PENNINGTON GUARANTEE

If you, the consumer, are not satisfied with this product after use in accordance with packaging instructions, you may be eligible for a refund. Send original receipt, empty packaging and a brief explanation within sixty days of purchase. Upon verification, we will send you a refund check for the purchase price.

BEST TIME TO PLANT SEED

- The best time to plant grass seed is in early Spring or early Fall.
- Grass seed germinates and establishes best when average daily temperatures are between 60° F and 80° F.

PLANTING INSTRUCTIONS

4 Easy Steps to Planting Seed

1. PREPARE THE SOIL

Bare Spots and New Lawns

- Remove all debris from planting area.
- Till or rake to loosen top 2" to 3" of soil.
- Rake smooth to create a flat, level planting area.

Overseeding and Thin Areas

- Mow the lawn as short as possible & remove clippings.
- Rake thoroughly removing thatch (dead grass) and debris to expose the soil.
- Aerate lawn if possible to allow better air and water penetration into the soil.

2. FERTILIZE PLANTING AREA

- Apply a starter fertilizer at the manufacturer's recommended rate.
- Lime may need to be added in some areas to ensure proper soil pH levels.

3. PLANT THE SEED

- Using a drop-type, rotary or hand held spreader, apply the seed evenly to avoid skips, overlapping & streaking.
- Gently rake, working seed into soil about 1/4".

4. WATER SEEDED AREA

- Water daily to keep soil moist.
- Do not allow the top 1/2" of the soil to become dry until seedlings have completely emerged.
- Once grass becomes established, reduce watering to 1/2" twice a week.

NOTICE: Arbitration/conciliation/mediation required by several states. Under the seed laws of several states, arbitration, mediation, or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed, to which this notice is attached, to produce as represented. The consumer shall file a complaint (sworn for FL, IN, MS, MT, SC, TX, WA; signed only GA, CA, ID, ND, SD) along with the required filing fee (where applicable) with the commissioner/director/secretary of agriculture, seed commissioner (IN), or chief agricultural officer within such a time as to permit inspection of the crops, plants, or trees by the designated agency and the seedsman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

ESPECIFICACIONES DE SIEMBRA

DOSIS DE SIEMBRA:

Césped Nuevo: 10 lbs./1,000 pies cuadrados

Re-Siembra ó Sobre-Siembra:
5 lbs./1,000 pies cuadrados

El paquete cubre:

5,000 pies cuadrados para césped nuevo
10,000 pies cuadrados para re-siembra ó sobre-sembrar

Profundidad de Siembra: 1/4"

Tiempo de Germinación: 7-14 días

Tolerancia al Trafico: Muy Buena

Tolerancia al Sol: Buena

Tolerancia al la Sombra: Mediana

Tolerancia al la Sequía: Moderada

Se Recomienda Cortar a la Altura de: 3"

INSTRUCCIONES DE SIEMBRA

4 Pasos Fáciles para Plantar Semilla

1. Preparar la Tierra

Áreas Descubiertas y Céspedes Nuevos

- Remueva todo el desecho del área que va a sembrar.
- Rastrille para aflojar de 2" a 3" de la cobertura de la tierra.
- Rastrille suavemente para crear una área de siembra nivelada y pareja.

Para Sobre Siembra y Áreas Poco Densas

- Corte el césped existente lo mas corto posible y remueva toda la corteza.
- Rastrille profundamente para remover todo el césped seco y desechos para exponer la tierra.
- Si es posible airee el césped para permitir la penetración de aire y agua a la tierra.

2. Fertilización

- Aplique un fertilizante de inicio usando los índices recomendados por el fabricante para buenos resultados.
- En algunas regiones es necesario utilizar Cal para balancear el nivel de pH en la tierra.

3. Sembrar la Semilla

- Use una propagadora de mano, rotaria ó tipo-caída, aplique la semilla de modo uniforme con los índices recomendados para evitar áreas sin semilla, áreas con sobre-siembra ó áreas manchadas.
- Rastrille suavemente el área sembrada para que la semilla quede a una profundidad de la tierra de 1/4".

4. Regar el Área Sembrada

- Riegue diariamente para mantener la tierra húmeda.
- No permita que 1/2" de la superficie de la tierra se seque hasta que las plantas hayan emergido completamente.
- Una vez que el césped se haya establecido reduzca el agua a 1/2" dos veces por semana.
