

FridgeCam™

Know what you have in, even when you're out.

FridgeCam is the world's first wireless camera that retrofits inside your fridge door and turns any fridge into a smart fridge. This allows you to see and track what's inside your fridge via the Smarter App, which learns to recognize food items and add them to your shopping list when they run out.

smarter

Always see what you need

FridgeCam takes a photo every time you close your fridge door and sends it to your phone.

Learn & remember

Teach FridgeCam to recognize food items in your fridge and new items can be added easily to keep up to date.

Shopping list

A shopping list is created to replenish the items which are consumed.

Best before tracker

Get reminded before items expire so you can use them.

Integration

Get the help you want by integrating FridgeCam with your digital home assistants like Amazon Alexa and more with the use of IFTTT.
