## **Product Description**

The DLR4 from NICOR is a 4" recessed LED downlight that is ideal for new construction using the patented new construction frame and retrofit into most 4" housings. Improved to meet the newest certification standards, the DLR4 is over 70 LPW, 90+ CRI and R9 greater than 60. The DLR4v5 system of the downlight combined with the frame provides the lowest overall system cost for energy efficient, high quality lighting.

#### Construction

- · Spun aluminum trim routes heat away from electrical components
- Ultra low profile, integrated driver designed for DLR4 frame use
- Airtight when used with DLR4 frame
- Also allows for use in shallow housings

#### **Optical System**

Polystyrene diffuser and reflector cone create a uniform light distribution that reduces glare without sacrificing lumen output

· Increased trim depth provides lower glare and a quieter ceiling.

#### Electrical

- Utilizes high performing LEDs with >90 CRI and an R9 >60 (not available on 5000K)
- Dimmable to 5% with compatible TRIAC dimmers
- Operating temperature rating of 0°F to 120°F (-18°C to 49°C)
- Input voltage of 120V
- Lifetime rated for greater than 60,000 hours
- LM-79 testing performed in accordance with IESNA standards
- Meets FCC Part 15, Subpart B, Class B standards for conducted and radiated emissions

#### Finish

- Exterior white powder coat finish
- Available accessory trim covers in Black, Oil-Rubbed Bronze and Nickel

#### Installation

- Compatible with patented DLR4 frame
- Compatible with most 4" recessed housings
- Quick and easy installation with friction clip system
- · Ships with Edison base socket string (GU24 socket string available)

#### Warranty

• 5-year limited system warranty

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.
