Shower / Tub Door Installation Instructions

IMPORTANT

DreamLine[®] reserves the right to alter, modify or redesign products at any time without prior notice. For the latest up-to-date technical drawings, manuals, warranty information or additional details please refer to your model's web page on **DreamLine.com**

Please read these instructions carefully before installing. If you have any questions regarding installation, please contact our technical support specialists Monday through Friday 8:00 AM – 7:00 PM EST at Phone: 1-866-731-2244, Fax: 1-866-857-3638 or e-mail our technical support group at **Support@DreamLine.com**

For more information about DreamLine® Shower Doors & Tub Doors please visit DreamLine.com

This model is treated with DreamLine's exclusive ClearMax[™] Glass technology. This is a specially formulated coating that prevents the buildup of soap and water spots.

Install the surface with the ClearMax[™] label towards the inside of the shower. Please note that depending on the model, the glass may be coated on either one or both surfaces.

For best results, squeegee the glass after each use and dry with a soft cloth.

Preparation

1. Prior to installation, examine all boxes and packages for shipping damage and compare the piece count with your packing slip. After opening all boxes and packages read this introduction carefully. Check that all of the needed parts are included in the package by checking off the components on the "Detailed Diagram of Shower Door Components". If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within **3 business days** of the delivery date. **Please note that DreamLine® will not replace any damaged products or missing parts free of charge after 3 business days or if the product has been installed.** Feel free to contact DreamLine® if you have any questions and please provide an order number, job name or other proof of purchase to help identify the original order.

2. Please note that you should **consult your local building codes with questions on installation compliance standards.** Building and plumbing codes may vary by location, and **DreamLine® is not responsible for code compliance standards for your project and will not accept any returns.**

3. If this unit is going to be installed in a new construction, please install all of the required plumbing and drainage before installing the shower. Use a competent and licensed (if required by local code) plumber for all plumbing installation.

4. Please make sure that prior to beginning the installation, the surfaces are leveled and solid and will be able to support the total weight of the unit. Also make sure the walls are at right angles. Irregular installation surface level, radius corners or improper angle of side walls will result in serious problems for your installation. Please, note that some adjustments and drilling might be necessary during the installation process.

5. Please protect all primary surfaces of the product during installation. Never set your glass down directly onto a tile floor. Leave corner protectors in place until necessary to remove them. Always use a piece of wood or cardboard to protect the bottom edge and corners of the glass prior to and during installation.

6. This unit must be installed upon a finished threshold and against finished walls.

7. **This model does NOT have any adjustment for out of plumb conditions.** Verify that your walls are plumb before proceeding with the installation.

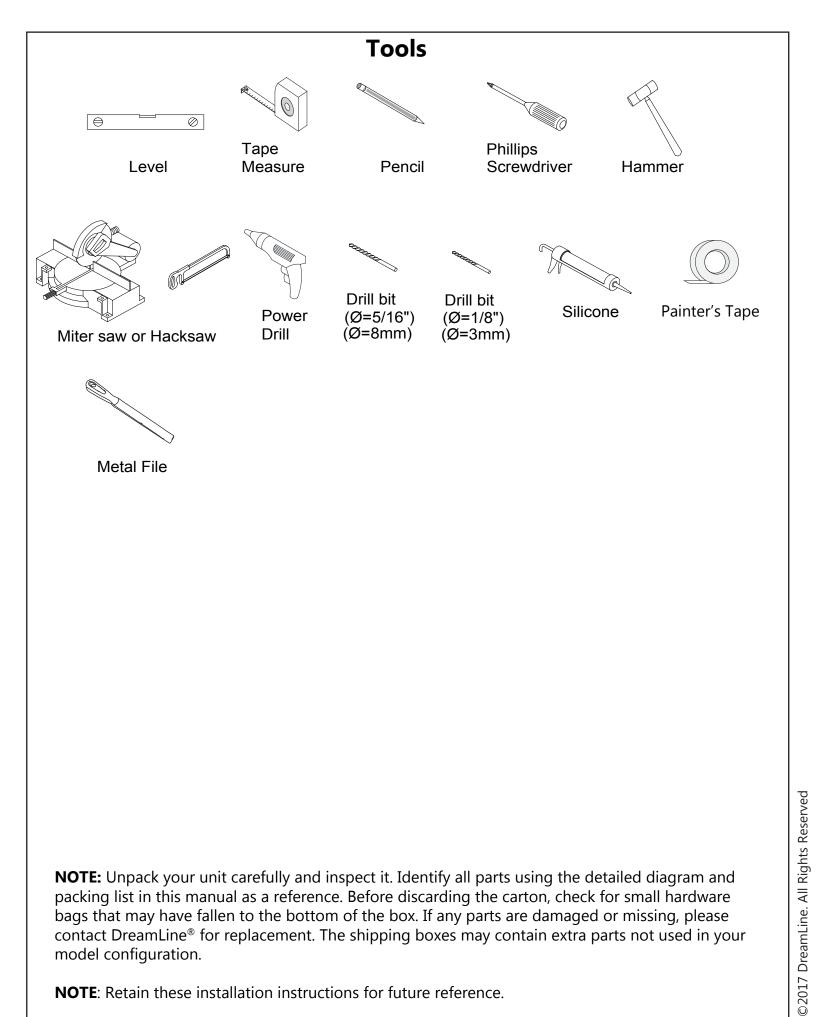

8. This model requires a minimum 2-3/4" of flat threshold space for installation.

9. These instructions will show the installation of the shower door as an example.. Please follow the same steps for the installation of the tub door.

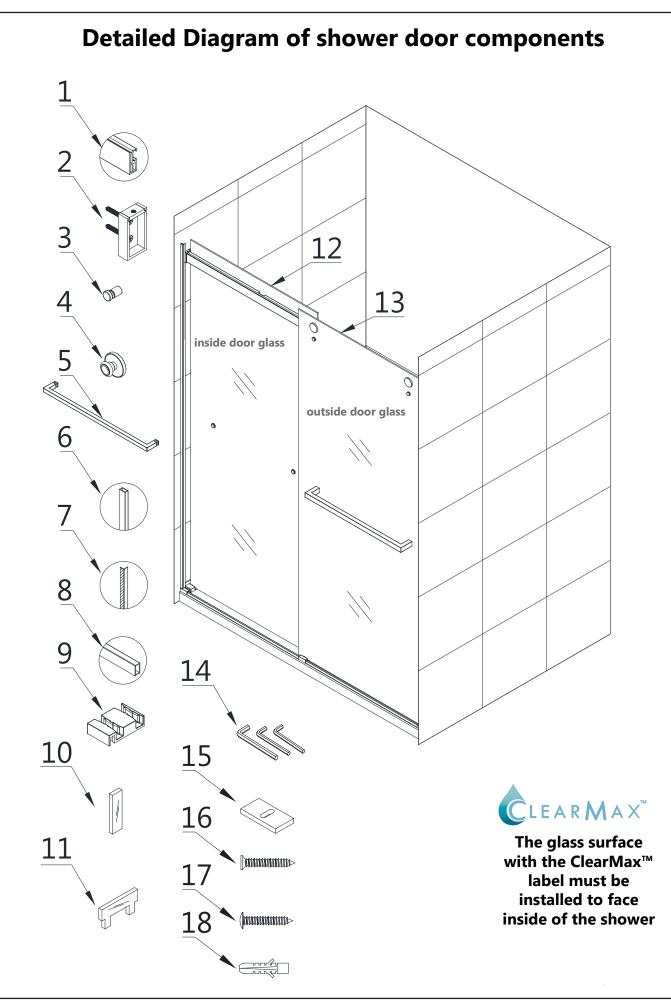

NOTE:

DO NOT install the towel bars on the glass until instructed to do so. **DO NOT** lift the glass using the towel bars. This could result in damage to the glass and/or serious personal injury. Always use an assistant or a professional grade glass suction cup when handling heavy glass.

NOTE: Retain these installation instructions for future reference.

Detailed Diagram of shower door components

Parts List

#	ltem	Qty	#	Item	Qty
01	Upper Guide Rail	1pc	10	Upper Bumper	4pcs
02	Wall Bracket Assembly	2pcs	11	Bottom Bumper	2pcs
03	Roller Guard	2pcs	12	Inside Door Glass	1pc
04	Roller	4pcs	13	Outside Door Glass	1pc
05	Towel Bar	2pcs	14	Allen Wrench: 2.5mm / 3mm / 4mm	1 each
06	Wall Profile	2pcs	15	Guide block bracket	3pcs
07	Anti-water side strip	2pcs	16	Countersunk screw ST4.2x40	4 pcs
08	Bottom Rail	1pc	17	Truss Head Screw ST4.2x40	3 pcs
09	Guide Block	3pcs	18	Φ5/16" (8mm) wall anchors	7 pcs

<u>Boxes</u>

#	Box	Package Contents by part#		
1	Glass Box	7. 12. 13		
2	Profile and Acc Box	1. 2. 3. 4. 5. 6. 8. 9. 10. 11. 14. 15. 16. 17. 18		
3	Spare Acc Box	10. 11 - 1 pc/ea Φ5/16" (8mm) anchors, countersunk screw ST4.2×40 - 3 pcs/ea		

Installation steps

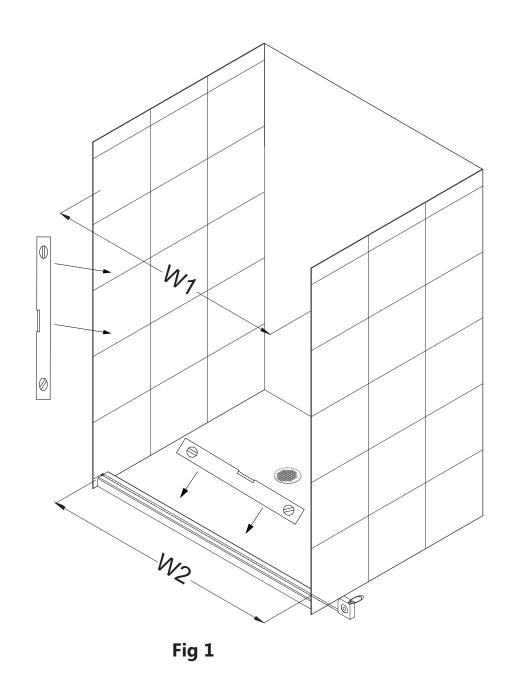

1. Measure the finished opening width at the bottom and at the model height.

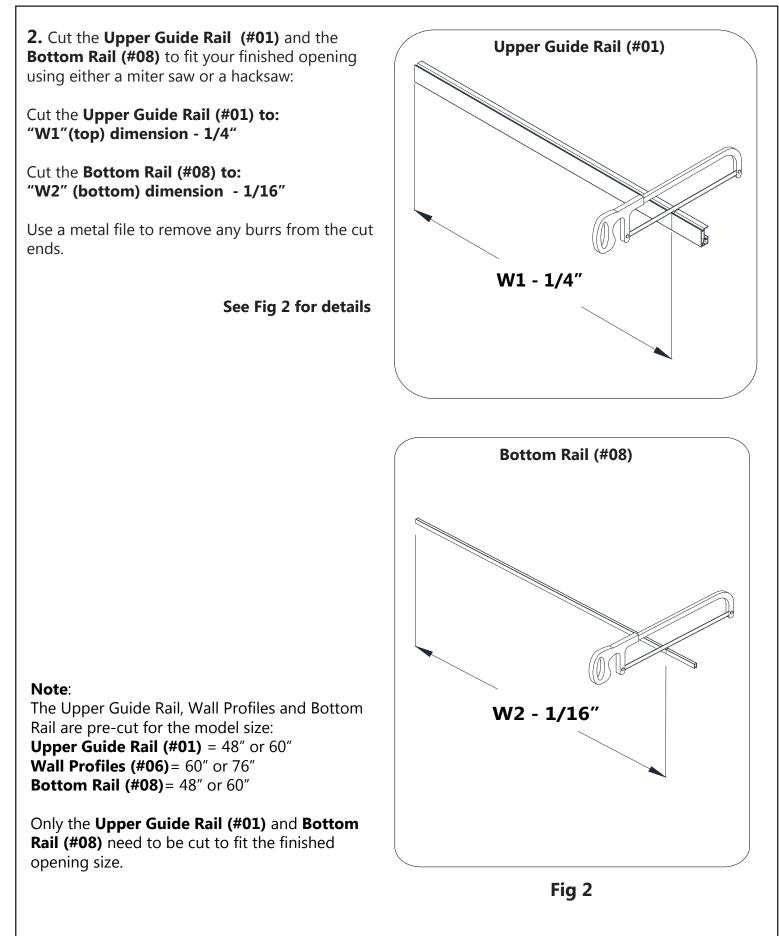

Use these dimensions as "W1" (top) and "W2" (bottom) in step #2.

Also check the threshold for level and the walls for plumb.

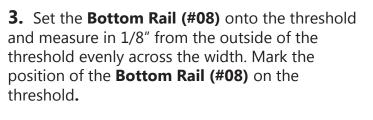

Note: This model does not have adjustment for out-of-plumb conditions.

See Fig 1 for details

See Fig 3 for details

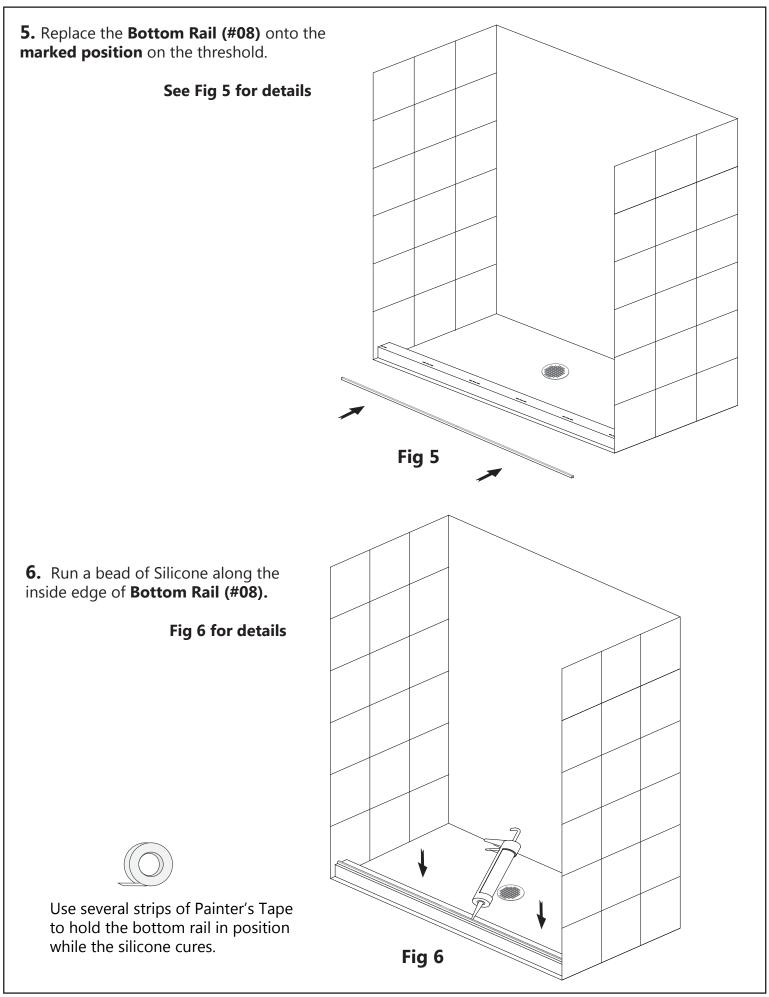

Note: This model requires a minimum 2-3/4" of flat threshold space for installation.

4. Apply silicone into the groove along the bottom of the **Bottom Rail (#08)**.

See Fig 4 for details

9

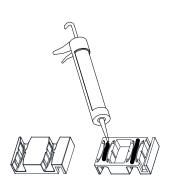

7. Place one of the **Guide Block Brackets (#15)** onto the threshold: 1-1/16" (27mm) from the outside of the **Bottom Rail (#08)** and 1/8" (3mm) from the wall. Mark the hole for drilling. (**See Fig 7 detail**)

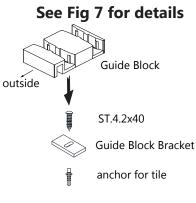

For installation onto a tile threshold, drill a Ø5/16" (8mm) hole and insert the Wall Anchor (#18)
For installation onto an acrylic threshold, drill an 1/8" (3mm) hole only and do not use the anchor.

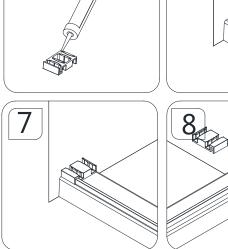

Apply silicone to the bottom of the **Guide Block Brackets (#15)** and attach to the threshold using an **ST4.2 x 40 Truss head Screw (#16).**

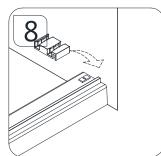

Apply silicone to the bottom of the **Guide block (#09)** and install it over the **Guide Block Bracket (#15)** and the **Bottom Rail (#08)**.

Repeat this process for the **Guide Block Bracket (#15)** and **Guide block (#09)** installation on the opposite wall.

9. Place the remaining Guide Block Bracket (#15) onto the threshold:

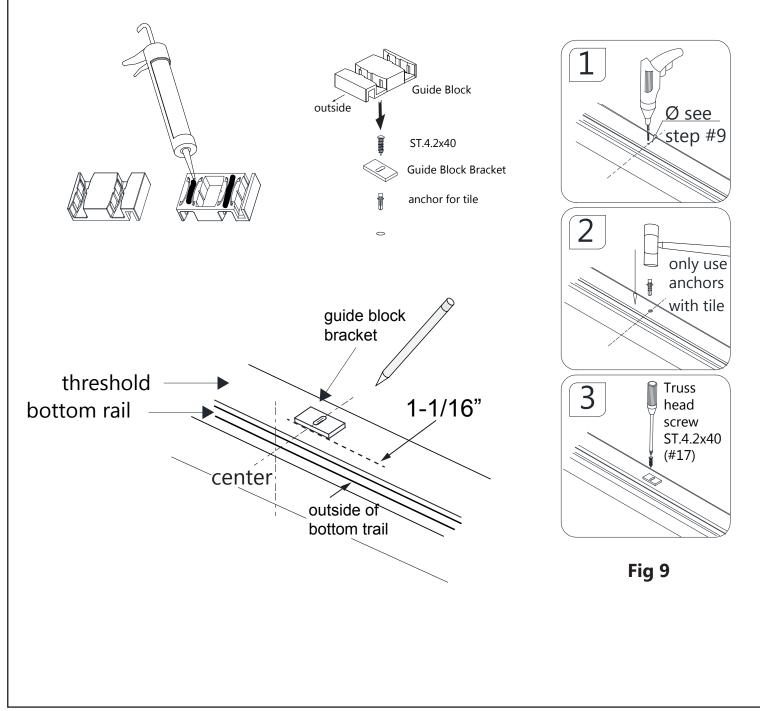

1-1/16" (27mm) from the outside of the **Bottom Rail (#08)** and align the slot with the centerline measured in the previous step. Mark the hole for drilling.

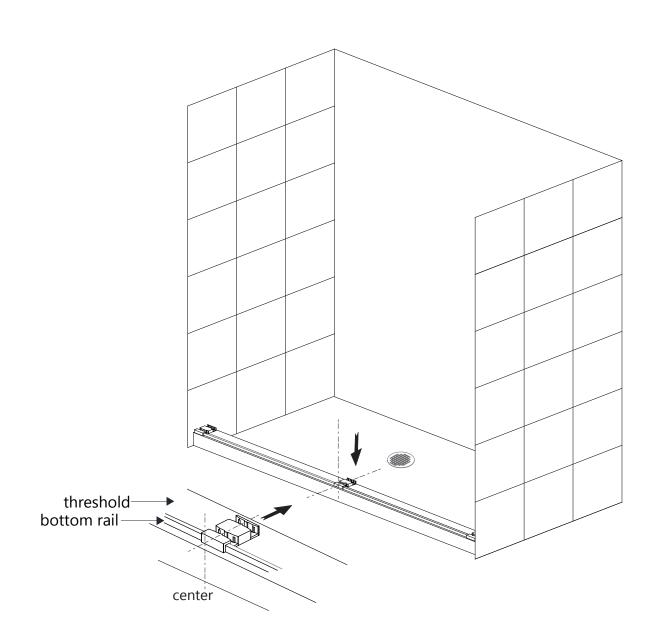

- For installation into a tile threshold, drill a Ø5/16" (8mm) hole and insert the Wall Anchor (#18)
- For installation into an acrylic threshold, drill an **1/8**" (**3mm**) hole and do not use the anchor.

Apply silicone to the bottom of the **Guide Block Bracket (#15)** and attach to the threshold using an **ST4.2 x 40 Truss head Screw (#16)**.

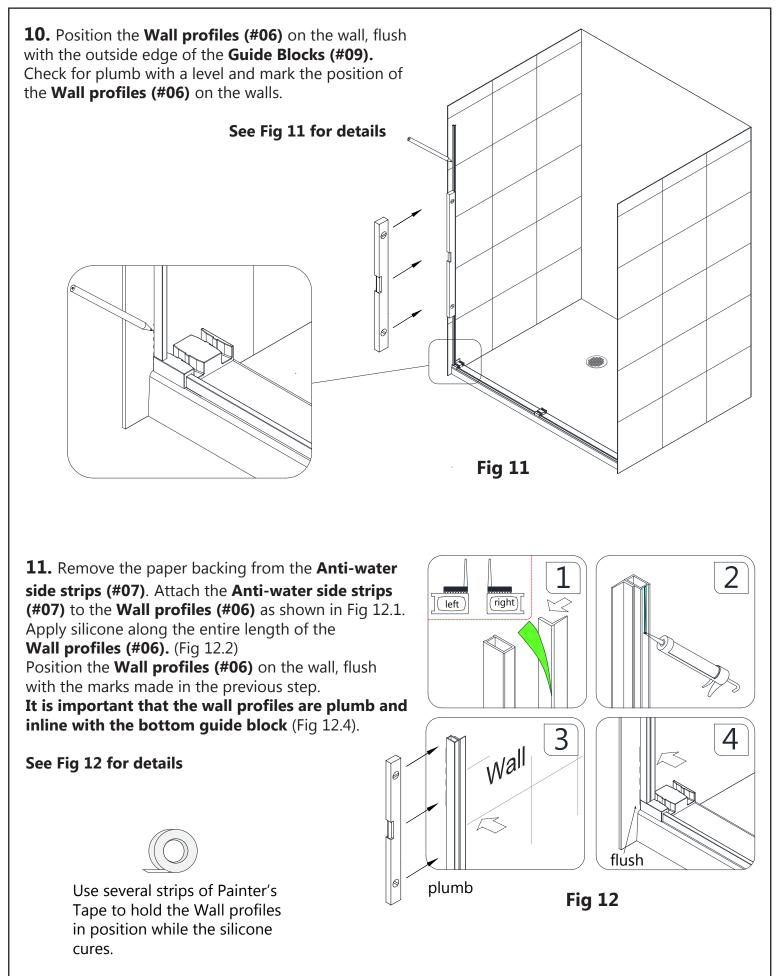

Apply silicone to the bottom of the **Guide block (#09)** and install it over the **Guide Block Bracket (#15)** and the **Bottom Rail (#08)**.

See Fig 9 & 10 for details

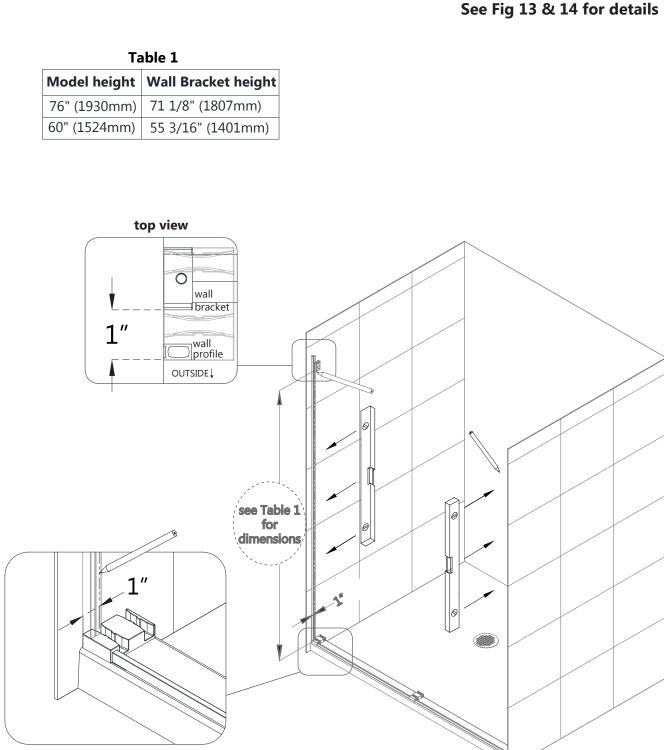

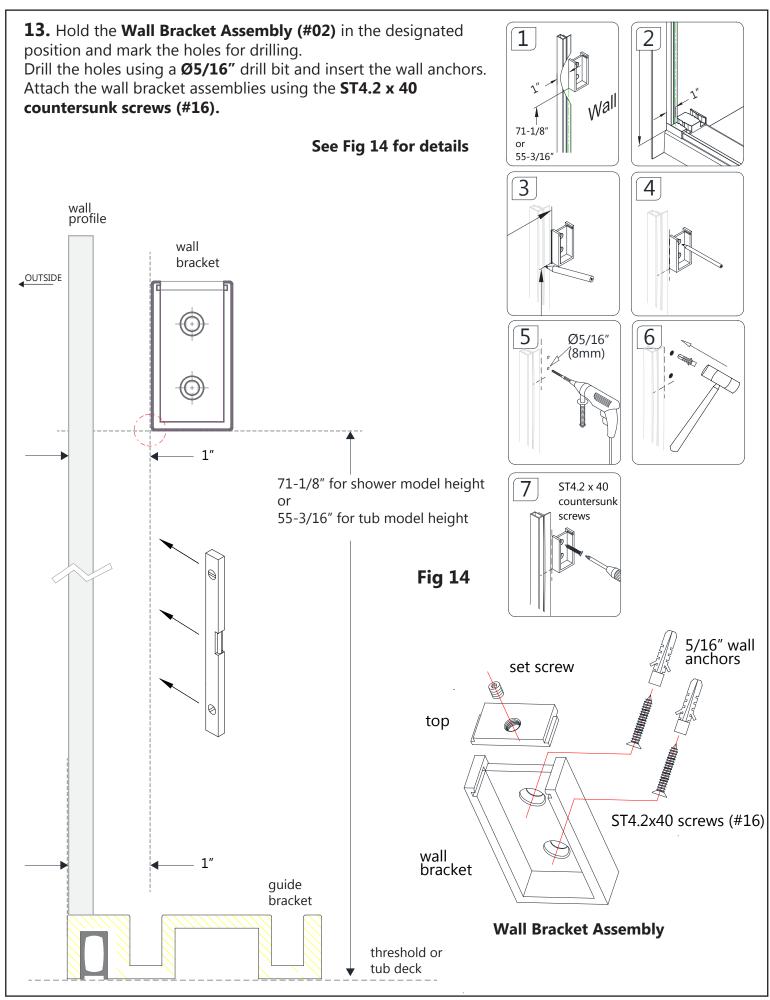

12. To position the Wall Bracket Assemblies (#02):

Measure up from the threshold to the bottom corner of the **Wall Bracket Assembly (#02)**: 71-1/8" for shower height model or 55-3/16" for tub height model. (**See Table 1**)

Measure in **1**" from the <u>outside</u> of the **Wall Profile (#06)** and draw a plumb line. Repeat this process, marking a plumb line on the opposite wall, **1**" in from the outside of the wall profile.

ESSENCE manual Ver 1 Rev 1.1 05/2017

16

14. Insert the **Upper Guide Rail (#01)** into the installed **Wall Bracket Assembly (#02).**

Temporarily attach the remaining **Wall Bracket Assembly (#02)** to the opposite end of the **Upper Guide rail** (**#01).** Place a level on top of the **Upper Guide rail (#01).** Align the **Wall Bracket Assembly (#02)** with the opposite plumb line from step#12 and mark the bracket's position on the wall.

Remove the **Upper Guide Rail (#01)** and position the wall bracket onto the wall and mark the holes for drilling. Drill the holes using a **Ø5/16**" drill bit and insert the **Wall anchors (#18)**. Attach the **Wall bracket** to the wall using the **ST4.2 x 40 Countersunk screws.** Slide the **Upper Guide Rail** (**#01**) into both **Wall brackets**, install both of the **Wall bracket assembly tops** and secure with the **set screws**.

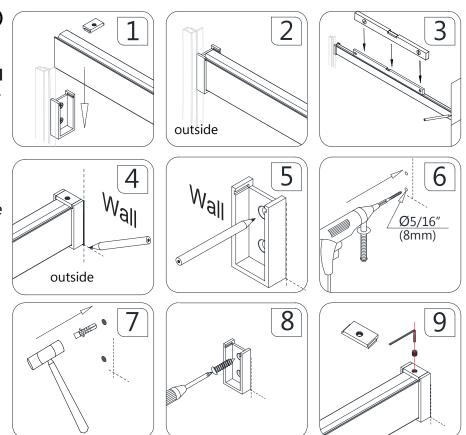

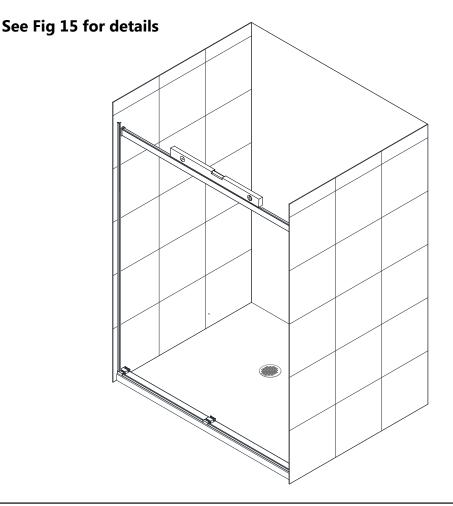

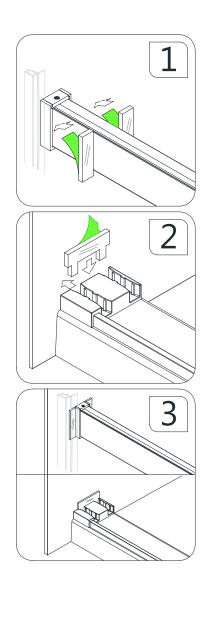

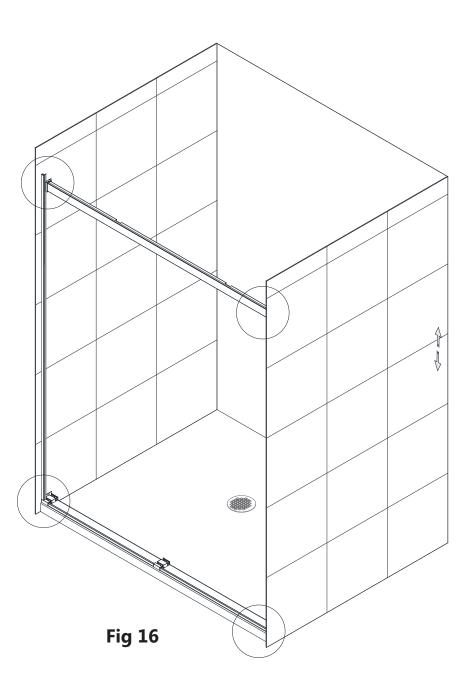

Fig 15

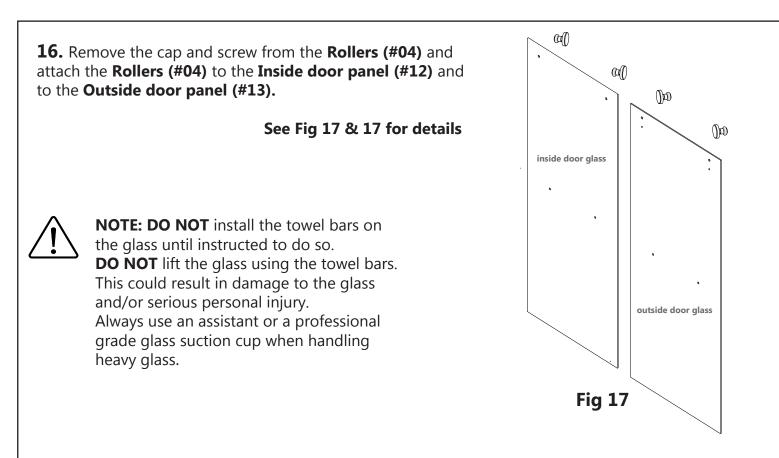

15. Remove the paper backing and attach the **Top Bumpers (#10)** to the wall on either side of both of the **Wall Bracket Assemblies (#02)**, flush with the top of the wall brackets (Fig 15.1). Remove the paper backing and attach the **Bottom Bumpers (#11)** into the **Guide blocks (#09)** and to the wall (Fig 16.2).

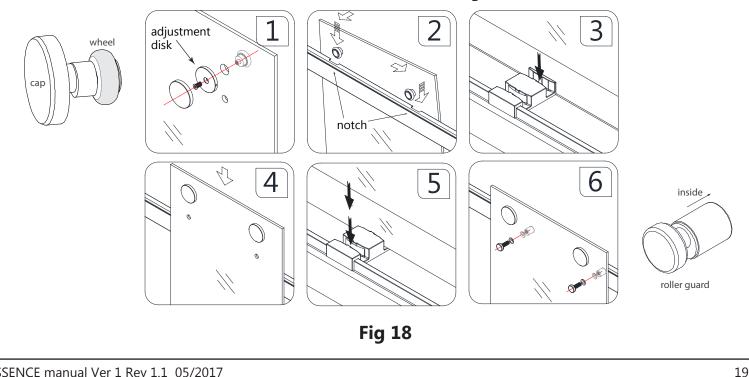

17. From inside the shower, hang the **Inside Door panel (#12)** first. Insert one wheel into the notch in the top of the Upper Guide Rail (#01). Slide the door over and insert the other roller wheel into the second notch (Fig 18.2) while inserting the Glass into the Guide block(#09). (Fig 18.3)

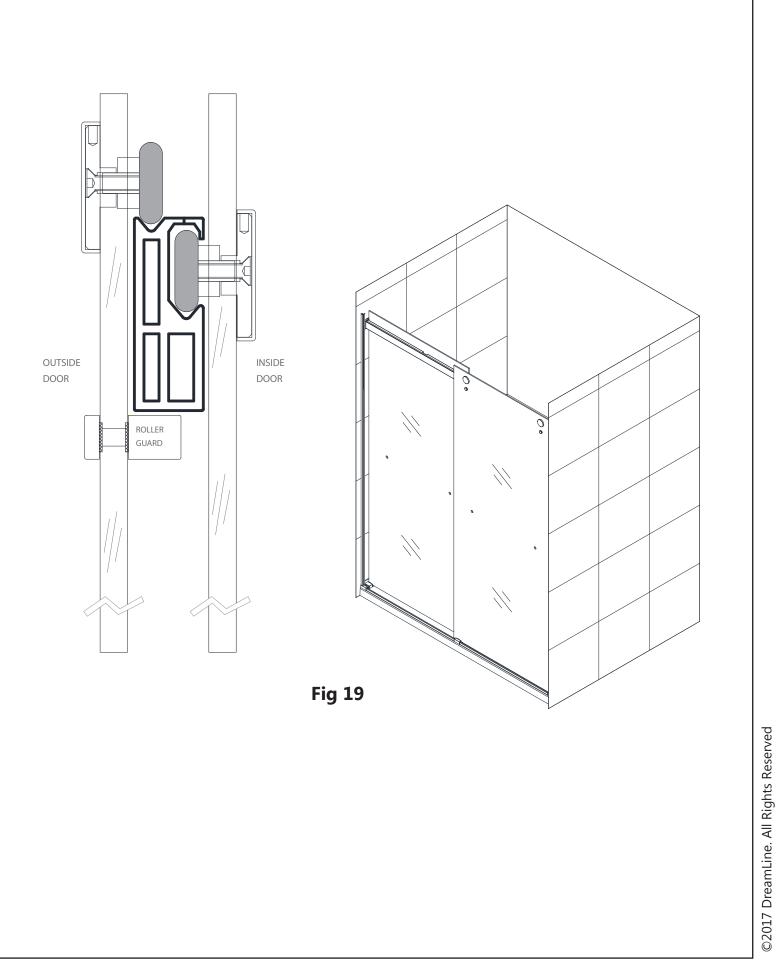

Next, from outside the shower, install the **Outside door panel (#13)** into the track on top of the Upper Guide Rail (#01) and into the Guide block (#09).

Attach the Roller Guards (#03) to the Outside door panel (#13) (Fig 18.6) to prevent the door glass from being lifted off of the Upper Guide Rail (#01).

See Fig 18 & 19 for details

ESSENCE manual Ver 1 Rev 1.1 05/2017

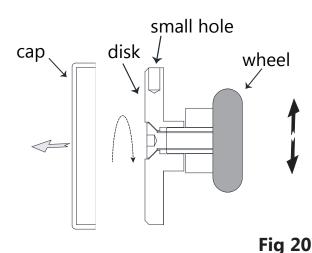

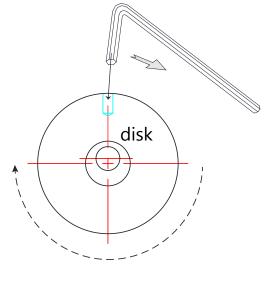

TIP: The wheel assembly bushing that fits through the hole in the glass is elliptical. By rotating this disk, the door glass can be adjusted slightly in order to make even contact with both the top and bottom wall bumpers.

- Use a shim beneath the door glass so that it does not make contact with the threshold during adjustments
- Temporarily adjust the roller guards for clearance
- Remove the cap from the wheel assembly and loosen the bolt
- Insert the small 2.5mm allen wrench or similar into the small hole in the edge of the adjustment disk to help rotate the disk (see Figure 20.1) and tilt the door glass into the desired position
- Hold the glass in position and re-tighten the bolt
- Test the operation of the door. Repeat on the other wheels as necessary
- Replace the Wheel assembly cap and re-adjust the roller guards

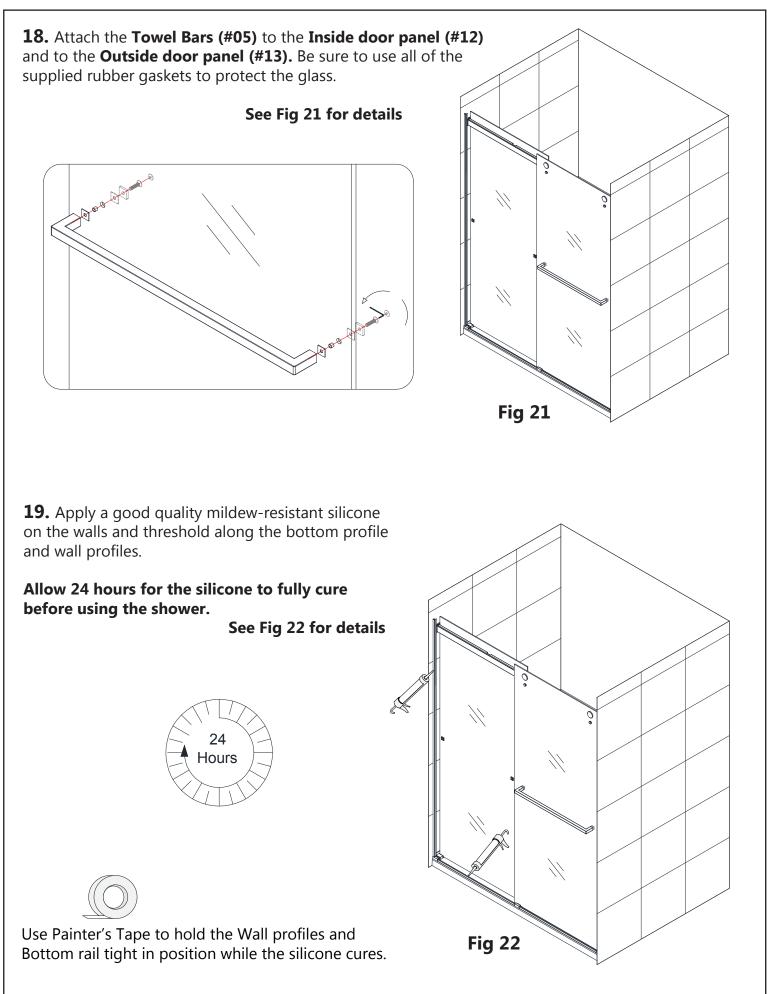

See Fig 20 for details

Product Maintenance

<u>BASES and BACKWALLS</u>: To ensure long lasting life for your acrylic back walls: wipe them off after each use with a soft cloth. To clean the acrylic back walls use non-abrasive sprays or cream based cleaners. Avoid the use of aerosol spray cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

<u>GLASS</u>: To ensure long lasting life for your glass shower products: wipe them off after each use with a soft cloth. Rinse and wipe off the glass using either a soft cloth or a squeegee to prevent soap buildup and water spots (Hard water can etch the surface of the glass over time if left to dry). To prevent scratching the surface: never use abrasive cleaners or cleaning products that contain scouring agents. Never use bristle brushes or abrasive sponges that may scratch the surface.

<u>HARDWARE</u>: To ensure a long lasting finish: wipe off the metal parts after each use with a soft cloth. Do not use abrasive cleaners or cleaning products containing ammonia, bleach or acid. If accidentally used, rinse the surface as soon as possible to prevent damage to the finish (peeling or corrosion). After cleaning the polished finishes, rinse thoroughly and wipe dry with soft cloth. Clean stainless steel surfaces at least once a week. When applying stainless steel cleaner or polish to stainless steel hardware, work with (not across) the grain. Never use an abrasive sponge or cloth, steel wool or wired brush as these may permanently scratch the surfaces.

NOTE: To maximize the life of your door, it is important to regularly inspect the glass and all hardware for misalignment, proper attachment, and/or damage. Contact DreamLine with any questions or concerns.
