

Sealant Solutions

PERFORMANCE BEYOND ORDINARY SEALANTS

Not all sealants are alike, just as no job is exactly the same as the other. Likewise, both DIYers and Pros have different needs. One thing that can never be compromised is performance and quality. Loctite® offers a wide variety of sealants specially formulated for the unique needs of the job and end-user.

More than just a caulk.

Loctite Polyseamseal® is for DIYers, plumbers and painters who want a high quality, easy-to-use sealant that offers advantages beyond just “filling a gap”. Polyseamseal’s unique “CAULK+” formulation provides performance not found in ordinary sealants, designed to have the strength of an adhesive & the sealing characteristics of a caulk. More than just a caulk, Polyseamseal delivers added benefits to the users, from the brand you have trusted for over 60 years.

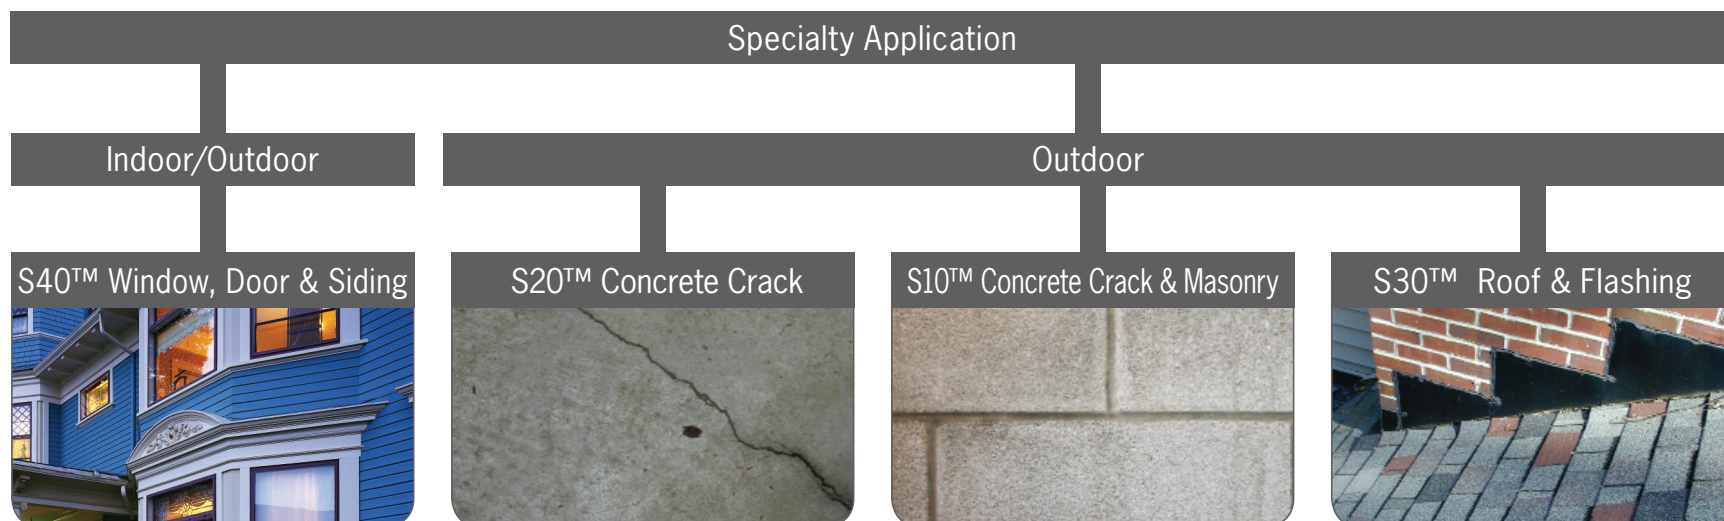

Engineered Solutions for the Professional.

Loctite PL® is the Pro Line of sealants, developed for superior performance in specialty applications. The polyurethane formulation provides the maximum in durability, flexibility and weather resistance for quality end-user solutions to sealant and repair needs.

What do You Need to Seal?

- Permanently flexible
- Resists weathering
- Paintable
- Meets ASTM C-920
- Multiple colors
- 10 fl oz. cartridges

- Self levels to fill horizontal cracks without tooling
