## **TECHNICAL DATA**

## Garb Bars

## Decorative Brab Bars

MATERIALS: Grab bar is constructed using 1-1/4" diameter 20 gauge 304

stainless steel tubing. Decorative posts and trim rings are cast in zinc. Trim rings are held in place using a friction fit. Meets ADA and ANSI A117.1-2003 for form and load bearing

requirements.

INSTALLATION: Install grab bar with  $3 - \#10 \times 2-1/2$ " flat head stainless steel

screws provided for each end wall flange. Slide cover flanges over wall flanges and press firmly to complete installation.

OPTIONAL FASTENER INFORMATION:

Wall studs or Wood blocking is preferable behind all wall surfaces. If wood blocking is not available, the following fasteners are suggested: Non-Stud Wall anchor.

SPECIFICATION: Surface mounted assist bar shall be

model

(fill in model number) by Liberty Hardware Manufacturing
