

AccuMASTER™

NEW!

10" DIGITAL LEVEL Model 7205

Accurate, Easy to Read and Built to Last

Be ready for the job at hand. Check the pitch of a roof, set the slope of forms or find out the relative angle of a floor. No matter what you build, knowing it is plumbed, leveled or sloped as planned will bring everything together accurately.

Find the type of angle you need anywhere with digital accuracy

- PITCH – Measure the angle of a roof in inches of rise per foot
- SLOPE – Measure an incline in percent or degree
- TRUE LEVEL – Displays the absolute angle of a work surface
- RELATIVE ANGLE MEASUREMENT – Compare the angle between two work surfaces
- AUDIO ALERT – Optional sound can chime for plumb and level
- ILLUMINATED DISPLAY – Bright green LED screen for ease of reading in all lighting conditions

- INVERT DISPLAY – LCD display inverts when using level upside down for easy reading
- DISPLAY "HOLDS" – Hold button locks display to allow unit to move for easier reading
- STURDY FRAME – Milled aluminum top and bottom rails ensure accurate measuring
- MAGNETS IN BASE – The bottom rail has strong magnets built in for steady measuring on metal pipes and conduit
- BUBBLE VIAL – Helps visualize angle
- ACCURACY – Accurate to $\pm 0.2^\circ$
- AUTO-OFF – Level has auto-off feature to extend battery life

Includes Protective pouch

Sturdy milled aluminum frame

Bright LED display always reads right side up for easy reading
