

MATTRESS

DON'T REMOVE THE TAG.

The tag sewn onto the mattress does serve as a means of identification should you have a warranty claim. Removal of tags may void your rights to warranty coverage. The removal of your mattress tag is NOT illegal or punishable by law.

DON'T JUMP ON YOUR MATTRESS.

Your new mattress set is designed for sleeping. Jumping on the mattress can damage the internal components and void your warranty.

MOVE YOUR MATTRESS IN THE UPRIGHT POSITION.

When moving your mattress always carry it upright. If you need to fit it through a doorway you can flex it a bit to fit. Do not force it as this will cause preventable damage.

LET YOUR MATTRESS BREATHE.

If you notice a slight new product odor, leave the mattress uncovered and let the mattress air-out before putting on any linens or mattress protection.

ROTATE YOUR MATTRESS.

It is suggested that you occasionally rotate your mattress. This will reduce body impressions due to the padded materials will be able to settle evenly. Body impressions occur normally in quality bedding where the upholstery layers conform to your body shape for support. Rotating your mattress will increase the durability of the product.

CLEAN YOUR MATTRESS.

Vacuuming is the recommended method to clean your mattress. Your mattress should be vacuumed frequently to remove dust particles. If you have spilled something directly on your mattress, use mild soap with cold water and lightly apply with a towel. Make sure the mattress is completely dry before placing the sheets back on top, moisture can cause mold growth.

USE A PROTECTIVE PAD.

Protect your mattress from stains, spills and moisture by using a washable mattress pad. Stains will void the manufacturer's product warranty; a mattress protector pad will protect your investment.
