

# SOL-LUX.

## Smart Solar-Powered Retractable Awning

### Solar Powered

The Sol-Lux Window Awning uses solar power to charge the battery it operates on, eliminating the need for any electrical wiring to the house!

### Fits most Windows

An authorized Sol-Lux dealer can take the appropriate measurements and order your custom window awning to the nearest 1/2 inch, from 39 in. - 120 in.

### Smart Technology

You can configure your preferences and manually operate the awnings using the free Sol-Lux mobile app.

### Wind/Motion Sensing

Sol-Lux window awnings automatically detect and react to excessive motion due to windy conditions. The sensitivity to motion can be adjusted from factory defaults using the free Sol-Lux mobile app.

### Highly Customizable

The Sol-Lux Window Awning can be configured in over 13,000 possible color combinations so that you can design your awnings to perfectly match your home's decor.

### Year Round Operation

In true eco-friendly fashion, Sol-Lux awnings know to stay closed on cold days to allow sunlight to help heat your home.
