

Play Protectors (Set of 2) (09-0012)

Play Protectors help keep your yard looking maintained by protecting areas that are exposed to the most foot traffic. Place a Play Protector anywhere you see bare soil areas or muddy areas around your play set.

Directions: Be sure to clear the area of any rocks, debris or tree roots before placing the mats on the ground.

Areas where Play Protectors are commonly used:

- Under the swings
- At the landing area for slides
- Under the trapeze bar
- Under the tire swing
- Beside the entrance or exit to the sand box
- At the base of a rock wall

!WARNING! - Play Protectors should be used in addition to other protective surfacing around an entire play set. For more information about protective surfacing around play sets visit the U.S. Consumer Product Safety (CPSC) website and download the Handbook for Public Playground Safety. The handbook can be downloaded in full at www.cpsc.gov/cpscpub/pubs/325.pdf

Play Protector shown in grass above for photography purposes only. Additional protective surfacing should be used under swings as described in the CPSC handbook.

FOR RESIDENTIAL USE ONLY
FOR CHILDREN AGES 3-11
