HELP US HELP YOU...

Read this guide carefully.

It is intended to help you operate and maintain your new appliance properly.

Keep it handy to answer your questions.
If you don’t understand something or you need more help, please call:

Panda Products
1-866-371-2888

Keep proof of original purchase date (such as your sales slip) with this guide to establish the warranty period.

Write down the model and serial numbers.

You’ll find them on a plate located on the back wall of the appliance.

Please write these numbers here:

Date of Purchase

Model Number

Serial Number

Use these numbers in any correspondence or service calls concerning your appliance.

If you received a damaged appliance, immediately contact the dealer (or builder) that sold you the appliance.

Save time and money. Before you call for service, check the Troubleshooting Guide. It lists causes of minor operating problems that you can correct yourself.

IF YOU NEED SERVICE

We’re proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are some steps to follow for further help.

FIRST, contact the people who serviced your appliance. Explain why you are not pleased. In most cases, this will solve the problem.

NEXT, if you are still not pleased, write all the details, including your telephone number, and email to:

service@ezbyonline.com

WARNING

-Risk of Fire

Clothes dryer installation must be performed by a qualified installer.
Install clothes dryer according to the manufacturers instructions and local codes.

Do not install a clothes dryer with flexible plastic venting materials. If flexible metal (foil type) duct is install, it must be of a specific type identified by the appliance manufacturer as suitable for use with clothes dryers. Flexible venting materials are known to collapse, be easily crushed, and trap lint. These conditions will obstruct clothes dryer airflow and increase the risk of fire.

To reduce the risk of severe injury or death, follow all Installation instructions.

Connet To Individual Branch Circuit.

This appliance must be grounded. In the event of malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and grounded in accordance with all local codes and ordinances.

WARNING

- Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative or personnel if you are in doubt as to whether the appliance is properly grounded.

Do not modify the plug provided with the appliance: if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

It must be placed on firm horizontal ground. Do not place the dryer on carpet as this will block the intake. There should be at least 5 inches between the dryer and the walls.

Place the dryer in a dry well ventilated area. It should be positioned away from heat and direct sunlight.

Do not wash directly with water.

Do not use gasoline or alcohol.

Do not use any type of spray cleaner when cleaning the interior. If dryer drum becomes stained, clean the drum with a damp cloth.

Remove any residue before drying the next load.

Clean cabinet with mild soap and water. Do not use harsh or abrasive cleaners, this could damage the dryer.
Important Safeguards

When using electrical appliances, in order to reduce the risk of fire, electric shock, and/or injury to persons, basic safety precautions should always be followed, including:

For Your Safety

Read all instructions carefully, even if you are quite familiar with the appliance.

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Do not allow children to play on or in the appliance. Close supervision of children is necessary when the appliance is used near children.
- INDOOR USE ONLY – this appliance is not intended for outdoor use.
- Do not place naked flame sources, such as candles, on the appliance.
- Do not locate the appliance or cord near heat sources such as radiators, heaters, air ducts or direct sunlight.
- Do not block any of the ventilation openings. Ensure that vents are not covered by newspapers, tablecloths, curtains, etc.
- Do not run the cord under floor coverings. Instead, arrange the cord away from traffic areas where it will not become a trip hazard.
- To disconnect the appliance, turn the appliance off, switch off the power outlet and remove the plug from the power outlet.
- Do not misuse the cord. Never carry the appliance by the cord or pull to disconnect it from the outlet. Instead, grasp the plug and pull to disconnect.
- Do not operate the appliance if it has a damaged cord or plug; after the appliance malfunctions; or has been dropped or damaged in any way. Consult the manufacturer.
- Do not attempt to repair, disassemble or modify this appliance. The warranty becomes void if not serviced or repaired by a qualified person.
- Do not reach into the appliance if the drum is moving.

- Do not place items that have been soiled with flammable liquids inside the dryer without washing them with detergent thoroughly before hand.
- Do not excessively bend, stretch, twist or bind the power cord or place heavy objects on it.
- This appliance is only to be serviced by a qualified person. There are no user-serviceable parts inside.
- Do not install in a tight fitting cabinet.
- Do not overload the tumble dryer.
- Do not dry articles that have been previously cleaned in, washed in, soaked in, or spotted with gasoline, dry-cleaning solvents, or other flammable or explosive substances, as they give off vapours that could ignite or explode.
- Before the appliance is removed from service or discarded, remove the door to the drying compartment.
- Do not install or store this appliance where it will be exposed to the weather.
- Do not tamper with controls.
- Do not repair or replace any part of the appliance or attempt any servicing unless specifically recommended in the user-maintenance instructions or in published user-repair instructions that you understand and have the skills to carry out.
- Do not use fabric softeners or products to eliminate static unless recommended by the manufacturer of the fabric softener or product.
- Do not use heat to dry articles containing foam rubber or similarly textured rubber-like materials.
- Keep area around the exhaust opening and adjacent surrounding areas free from the accumulation of lint, dust, and dirt.
- The interior of the appliance and exhaust duct should be cleaned periodically by qualified service personnel.
- Do not place items exposed to cooking oils in your dryer. Items contaminated with cooking oils may contribute to a chemical reaction that could cause a load to catch fire.
- Ensure foreign objects do not find their way into the tub of the tumble dryer.
- Clean lint screen before or after each load.
Important Safety Instructions

-warning-

To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the appliance.
- **DANGER or WARNING**: Risk of child entrapment.
- Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous...even if they will “just sit in the garage a few days.”
- **Before you throw away your old appliance**: Take the door off so that children may not easily climb inside.
- Never allow children to operate, play with, or crawl inside the appliance.
- Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.
- Do not place the dryer in steamy rooms or where the dryer is directly exposed to rain. Moisture may destroy the electrical insulation causing an electrical shock hazard.
- During spinning, don’t put your hand in the spin basket: Because the spin basket is rotating at high speed, rotating parts may injure your hand.
- Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.

- Save these instructions -

**INSTALLATION INSTRUCTIONS**

**Before Using Your Appliance**

- Remove the exterior and interior packing.
- Check to be sure you have all of the following parts:
  - Instruction Manual
  - Allow at least 5 inches of space between the sides of the appliance.
  - Put your laundry into the dryer evenly. Uneven laundry may cause noise or vibration.
  - Before drying, check all pockets. If nails or pins remain in pockets, they may damage the dryer or clothes.
  - Never splash water on the control panel.
  - Plug the dryer into an exclusive properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and or grounding should be directed toward a certified electrician or an authorized Panda Products service center.

- Selecting a Location
  Before you install the dryer, select a location with the following characteristics:
  - A hard level surface (if the surface is uneven, see “Adjusting the Leveling Legs”).
  - If you are going to wall mount your dryer using the wall mounting kit included (see “Wall Mounting Instructions”).
  - Away from direct sunlight. Direct sunlight may affect the acrylic coating, plastic and electrical components.
  - Adequate ventilation
  - Room temperature that will not fall below 32°F.
  - Away from sources of heat such as coal or gas. Make sure that the dryer does not stand on its power cord. Ventilation openings must not be obstructed by carpeting when the dryer is installed on a carpeted floor.
Wall Mounting Instructions

1. Determine dryer position on wall and mark required bracket position. This dryer is not suitable to be directly placed on top of a washing machine.

*A minimum 50mm is needed between the top of the dryer and the ceiling for ease of installation.

* If mounting above a washing machine, allow sufficient room to open the lid of the washer.

<table>

Wall Mounting Kit Includes the following

| Wall Hanging Bracket | 2 |
| Wall Hanging Hook | 2 |
| Exhaust connector | 1 |
| 12mm long Screws | 4 |
| 25mm long Screws | 4 |
| Exhaust Pipe | 1 set |

2. Fix the wall hanging brackets (2 supplied) to the wall securely (e.g. into the stud). Fit a timber slat between the studs to mount the brackets onto if the stud position is too wide.

Fig 1

3. Install the Wall Hanging Hooks as shown in illustration (Fig. 2).

4. Align hanging hooks and fasten screws tightly.

5. Install the Exhaust Connector. Adjust the direction to suit the installation (as per Fig. 3).

6. Rotate the Connector clockwise to fix the pipe to the Connector Base. Tighten.

7. Using 4×12mm screws (provided) to fix the 2 Wall Hanging Bracket as per Fig 4.

8. With assistance, mount dryer on wall bracket. See Fig 5.

The appliance shall not be exhausted into a chimney, a wall, a ceiling, an attic, a crawl space, or a concealed space of a building.

Only rigid or flexible metal duct shall be used for exhausting.

In Canada, that only those foil-type flexible ducts, if any, specifically identified for use with the appliance by the manufacturer shall be used. In the United States, that only those foil-type flexible ducts, if any, specifically identified for use with the appliance by the manufacturer and that comply with the outline for Clothes Dryer Transition Duct, Subject 2158A, shall be used.
Adjusting the leveling legs

Your dryer is shipped with the legs in the bag containing your user's guide. To install and adjust the leveling legs see the illustration to the right.

If the floor is uneven adjust the legs (do not insert pieces of wood, or any other objects under the legs)
- Adjust the height level of the legs accordingly.

Place the dryer on a sturdy flat surface.
If the dryer is placed on an uneven or weak surface, noise or vibration will occur. (Allowable is 1°)

Electrical Connection

⚠️ Warning ⚠️

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized Panda Products service center.

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.

Do not under any circumstances cut or remove the third ground prong from the power cord supplied.

Use of extension cord is not recommended.

This appliance requires a standard 110/120-volt, 60Hz electrical outlet with three-prong ground. The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.

CONTROL PANEL

![Control Panel Diagram](Image)
OPERATING INSTRUCTIONS

MODE SELECTOR

NORMAL: By default, the dryer operated under the 'NORMAL' mode (the mode button is pressed), in combination with the presets, 'SENSORY DRY' and 'TIMER', for optimal drying performance. The 'SENSORY DRY' function can be adjusted to your drying needs by using the dial and temperature guidelines.

ECO: The Dryer operates using an energy-saving mode, independent of the 'SENSORY DRY' and the 'TIMER' functions. The dryer will automatically run in 'ECO' mode for a total duration of 270 minutes. The dryer will begin air drying the laundry for 150 minutes with cool air, followed by another 120 minutes using hot air by activating the heating element. Simply open and load the dryer, close the door, then depress the 'Mode' button, and the dryer will run in the 'ECO' mode. If the power turns off while the dryer is in 'ECO' mode, the unit will remember the time remaining and resume drying when the power goes on again. Memory won't be affected if the door is opened when the unit is off. However, if the door is opened while the dryer is on, the remainder time will not be remembered and 'ECO' drying will not resume.

SENSORY DRY SELECTOR

ON: When the drying time reaches 120 minutes, the sensor dry function measures the moisture and humidity levels during the cycle and automatically adjusts the heating time for a more efficient drying performance. As a result, the dryer may stop generating heat in advance of the 'TIMER' preset, but the preset cycle continues by pushing cool air until the drying time finished in the 'Off/0' position.

OFF: The dryer operates according to the time set by the 'TIMER' until the preset finished in the 'Off/0' position.

TIME SETTING

OFF: When the 'TIMER' is in the 'OFF/0' position, power is not supplied to the unit. Turning the dial clockwise to the desired program will start the dryer.

COOL: This setting is generally used to cool items that have just been dried to help prevent creasing. It will generate cool air, instead of the motor pushing heat into the drum of the dryer.

- ANTI-WRINKLE: For laundry loads that are difficult to iron (e.g. cotton shirts and linen), set the 'TIMER' between 30-60 minutes, depending on the load size. Once the cycle stops, the items will still contain moisture, thereby making the ironing process easier.

- WARM: This setting is used to dry and cool, and depending on the material, leave items wrinkle free. Set the 'TIMER' by turning the dial clockwise between 60-120 minutes

- HOT: This setting is used for drying large quantities or bulky items (i.e. the dryer drum is more than ½ full). Set the 'TIMER' by turning the dial clockwise to 120+ minutes.

- AIR DRY: This setting is used without any heat to freshen items by letting cool air move through it (e.g. clothes that have been stored for an extended period of time).

NOTE: ALWAYS make sure items being dried have gone through the Spin cycle in the washing machine first.

DRYING TIME REFERENCE

</tr>
</tbody>
</table>
Sorting Fabrics

For the best drying results, clothes should be sorted properly. Separate the lint shedders (chenille and terry cloth) from the lint collectors (synthetics, flannel and fabrics with a nap, such as velveteen and corduroy). Separate non-colorfast from light colored items, heavy fabrics from light weight fabrics and permanent press from heavy, bulky items.

Do not tumble dry
Read all permanent care labels carefully. If a garment’s care label says “Drip Dry”, Line Dry or “Dry Flat”, do not dry in the dryer. Certain materials will melt or become dangerously flammable if heated, while others may lose their shape. Other items that should not be tumble dried are:

- Items that have been dry-cleaned at home.
- Wool (unless the garment’s manufacturer recommends it)
- Fiberglass
- Laminated or rubber coated items
- Vinyl or plastic
- Do not use fabric softeners or products to eliminate static unless recommended by manufacturer of the fabric softener or product.

WARNING:
To reduce the risk of fire, electric shock, or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS before operating this appliance.

Drying Time
Drying time depends on many factors, such as the amount of washing, how damp it is, the type of fabrics, rated power of the machine and the temperature of the room. It also, of course, depends on how dry you want the washing when you take it out of the machine.

Shrinkage
Knitted fabrics in particular are liable to shrink. Do not use the extra dry program for these materials, and always stretch them out directly after drying.

Dryer Added Fabric Softeners
Because some dryer added fabric softeners may cause damage to automatic dryers, use only ones that the manufacturers give a written assurance that their softeners can safely be used in your dryer.

Single Items
Use the timed program when there is only one item to be dried. This is because the automatic program may turn off the heating too early, so that the item is not properly dried.

If The Washing Is Not Dry After Tumble-Drying
When using the automatic programs, it can happen that not all of the washing is properly dry. This may be due to such reasons as very heavy fabrics or thick seams. To dry these items, give a further 10 minutes or so in the timed program. Also do not overload the dryer. If the dryer is overloaded, its efficiency is lessened and clothes may not dry evenly.

Do not over-dry
When using the timed program, it is possible to over-dry fabrics, if too long a time has been set. This can cause the fabrics to wrinkle, shrink or feel harsh. Synthetic materials can also become charged with static electricity.
Fabric Care Chart

- Resistant material
- Delicate fabric
- Item may be washed at 203°F
- Item may be washed at 140°F
- Item may be washed at 104°F
- Item may be washed at 86°F
- Item may be hand washed
- Dry clean only
- Can be bleached in cold water
- Do not bleach
- Can be ironed at 392°F max
- Can be ironed at 302°F max

- Can be ironed at 212°F max
- Do not iron
- Can be dry cleaned using any solvent
- Dry clean with perchloride, lighter fuel, pure alcohol or R113 only
- Dry clean with aviation fuel, pure alcohol or R113 only
- Do not dry clean
- Dry flat
- Can be hung to dry
- Dry on clothes hanger
- Tumble dry, normal heat
- Tumble dry, reduced heat
- Do not tumble dry
CARE AND MAINTENANCE

**Cleaning the Exterior**
- Wipe the dryer surfaces, including the control panel, with a soft cloth and non-abrasive household detergents.
- Use a soft cloth to dry the surfaces.
- Do not pour water on the dryer.

**Cleaning the Filters**

*Unplug the power cord prior to any cleaning.*
