1

Unpack your Bamboo Edging and it should look like the following image:

2

Place the Bamboo Edging in the area you wish for it to stand. Once it is standing, use 2 wooden stakes (stakes not included with purchase) and hammer them into the ground next to each end of the Bamboo Edging.

3

Once the stakes are hammered in, use a wire, string, or large zip tie to tie the stakes and Bamboo Edging together. This will keep the Bamboo Edging from moving around or falling. Example and final look shown below.
