high performance

**FABRIC PROTECTANT**  
**INDOOR & OUTDOOR USE**

**EXTREME PROTECTION**  
SAFE WATER BASED FORMULA

**Ultra Effective Formula**  
**Protects Indoor & Outdoor Fabrics**  
**Repels Water, Oil, UV Rays**

Bayes Fabric Protectant is a unique product utilizing pure water as a carrier rather than hazardous and harmful acetone and petroleum distillates. It is safe to use indoors, yet provides maximum protection under extreme outdoor conditions. This ground breaking new formula gives all the performance of old fashioned aerosol repellents in a handy eco-responsible pump spray.

This product contains a special advanced polymer designed to repel both oil and water-borne stains from fabric. This is important in household environments where both water-borne stains (fruit juice, wine, soft drinks) and oil-borne stains (margarine, mayonnaise, ice cream) are present. Commonly used silicone based repellents are effective only against water-borne stains.

In addition to stain protection, Bayes Fabric Protectant also helps prevent UV degradation of fabric. Its unique multi-action polymer acts as a sunscreen for fabric, and helps prevent deterioration due to sunlight and other UV light sources.

*You won't believe the results!*

Los Alamitos,  
CA 90720

protects against  
water & oil based stains • harmful UV rays

contains no acetone  
or petroleum distillates
