

The only storage system for unfinished attic space!

# Get your attic together!

*Installs easily with no measuring or cutting!*

## All New Design

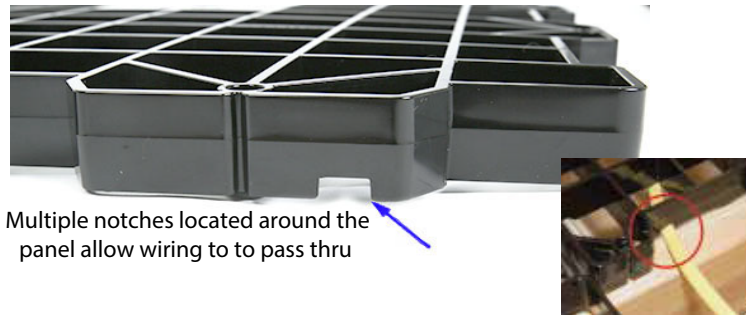

single panel to fit either 16 or 24 inches on center

No more hauling large sheets of plywood up in the attic

Allows moisture to pass thru unlike plywood

### Instructions:

1. Place panels in a configuration to fit your desired use
2. Tapered ribs on the underside of panel will help position panels between the joists
3. Where necessary utilize notches on underside to accommodate wiring and cables.
4. With the screws provided, screw in place to secure

Multiple notches located around the panel allow wiring to pass thru

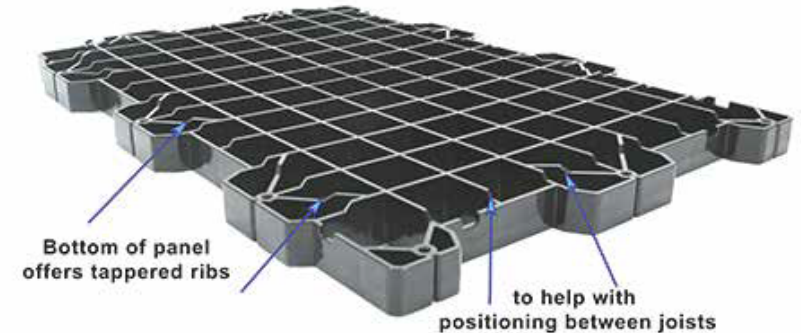

### Tools needed:

Power screw driver

### Included:

5 qty - #8 x 2" (phillips) per panel

Bottom of panel offers tapered ribs

to help with positioning between joists

**Warning:** weight must not exceed 250 lbs. per panel or the load limit of the structure. do not place directly on wires or cables.

Color may vary due to the use of reprocessed material.
