

A better way to clean.

PV 6 and 10 Pac-Vac® Vacuum

Lightweight Ergonomic Design,
Four-Stage HEPA Filtration,
Labor-Saving Cleaning
Productivity, and Maximum Value.

Maximize Cleaning Speed and Efficiency

Providing a faster and more cost-effective alternative to traditional upright vacuums, Tornado's PV 6 and 10 Pac-Vac backpack vacuums are the most powerful, easy-to-use and quiet backpack vacuums you'll ever use. Designed for superior operator comfort and increased productivity, these super-quiet units eliminate the need to bend over as required with traditional upright vacuums. Not only do workers expend less effort doing their jobs, getting in and out of tight or confined spaces becomes a breeze. As a result, cleaning productivity dramatically increases to over 7,000 square feet per hour.

Comfortable Design

The PV 6 and 10 Pac-Vacs deliver features for maximum comfort including a lightweight and durable injection molded housing designed to eliminate heat transfer from the motor to the operator's back. The PV 6 and 10 also boast heavy-duty padded nylon shoulder straps for a more secure fit.

Minimize Service Needs

With 1.9 HP, Tornado's PV 6 and 10 Pac-Vacs achieve static lift of 90" and airflow of 120 CFM at a super-quiet 71 decibels. The PV 6 and 10 have a lower cost of ownership over the life of the product compared to upright vacuums, thanks to minimal service requirements. And what's more is the PV 6 and 10 have the ability to recover paperclips and other debris that upright vacuum cleaners often struggle with.

Attention to Air-Quality

Reducing and minimizing dust particles and contaminants are critical to healthy buildings. While vacuuming is an extremely effective tool in removing potential allergens, use of the wrong machine can actually reintroduce contaminants back into the air. The PV 6 and 10 Pac-Vacs' true HEPA filtration (99.97% efficiency at 0.3 microns) is designed to contain fine particulate and dust, improving indoor air quality and reducing the risk associated with the redistribution of potentially harmful particles and allergens.

PV 6 and 10 Pac-Vac® Vacuums. Labor-Saving Cleaning Productivity, and Maximum Value.

Key Features

- True HEPA Filtration System for Improved Indoor Air Quality (IAQ)
- Superior 71 dB rating for whisper-quiet operation
- Lightweight at only 11 lbs.
- Ergonomically designed back support and harness
- 90" water lift
- 120 CFM
- Complete set of tools and adjustable double bend wand

Versatility

Tornado's PV 6 and 10 Pac-Vacs are perfect for use in a variety environments including hospitals, schools, libraries, commercial offices, government facilities, hotels and department stores.

Clean over 7,000 sq. ft. per hour!

PV 6 and 10 PAC-VACs® with HEPA

Cleaning System Applications

- Zone Cleaning
- Specialist Cleaning
- Day Cleaning
- Blended Cleaning
- Cooperative Cleaning

Versatility

Tornado's PV 6 and 10 Pac-Vacs are perfect for use in a variety environments including hospitals, schools, libraries, commercial offices, government facilities, hotels and department stores.

Ergonomic

Ergonomically designed back support and harness features a vented back plate for enhanced worker comfort and heavy-duty padded nylon shoulder straps for a better fit.

Packaged Complete

Standard attachments include a crush proof hose, double bend adjustable wand, easy glide floor tool, a dust brush, upholstery tool and crevice tool.
