Bamboo U-Shape Trellis Assembly

Note: This is only our suggested method of setting up Bamboo U-Shaped Trellises. You may do it in any way you want. This is just a suggestion to help.

Our Bamboo U-Shaped Trellises are all preassembled. They can be planted directly into the soil for quick use in any flower bed, planter, or soil plot. Additionally, optional use of stakes to raise up the trellis to avoid prolong exposure to the ground can increase the lifespan of your product.

Thank you for your business!
