

Plywood Snowman Yard Art

Paint your own Snowman yard decorations for a fraction of the price of buying one ready made! This is a festive, fun and easy craft project to help put you in the holiday spirit. Use our Snowman Cut-outs to decorate your own yard, or give away as a gift.

Note:

To display a 2 Ft x 4 Ft. Snowman in an upright position, you'll need a supporting strip of lumber or plywood (sold separately) cut to 3 feet in length, approximately 2 in. wide. Center the strip on the reverse side of the cutout at a point 3 feet from the base and attach it with a 3 in. strap hinge with a 3/8 in. screw.

To display a 1 Ft x 2 Ft Snowman, you'll need a supporting strip of lumber or plywood (sold separately) cut to 1-1/2 feet in length, approximately 2 in. wide. Center the strip on the reverse side of the cutout at a point 1-1/2 feet from the base and attach it with a 3 in. strap hinge with a 3/8 in. screw.

Fun holiday project

Pre-scored for easy painting

Ready to prime and paint

It's as easy as 1 – 2 – 3

- 1** Light sanding may be required - you **may** need to sand the edges with sandpaper before applying the primer
- 2** Apply one to two coats of primer - be sure to paint the plywood edges to prevent moisture from penetrating the plywood
- 3** When primer has dried, simply choose your favorite colors of water-based latex paint to decorate your snowman and protect the plywood

After the paint is completely dry, your snowman is ready to display and enjoy!

Materials List:

Suggested paint items: Primer, Red, White, Black and Gray water-based latex paint

Suggested Brushes: 1/2 " and 1-1/2 " for solid areas, 1/8" for outlining.

When your snowman is not in use, store in a dry, protected location and save for next year.
