

Square Strainer & Adapter Installation Instructions

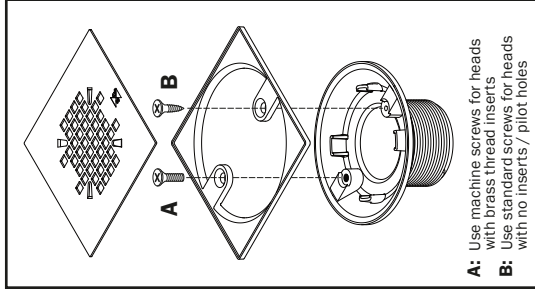

Always be aware of, and follow local plumbing codes

Failure to follow these instructions could result in personal injury or property damage

Converts round shower drain head/strainer to square

Designed for use with Sioux Chief 821 Series shower pan drains

Not for use with other types of shower drains

1. Remove round strainer from drain head.
2. Set the square adapter on the drain head and align the two screw holes with the screw receivers in drain head.
3. Using screws provided (machine screws for heads with brass thread inserts, standard screws for no inserts) fasten the square adapter to the drain head.
4. Snap strainer in place with four strainer legs in contact with four receivers in drain head and remove protective film.

TIP: If strainer is loose, the strainer legs can be bent slightly (with pliers) to provide more (or less, if difficult to snap in) contact with receivers.

5. If screws are visible through strainer after installation, turn strainer 90° and re-set.
