

HIGHPOWER™ AC1750 WI-FI® RANGE EXTENDER

PLUG-IN | DUAL BAND | 600mW | GIGABIT

The REC33A expands the range of any standard 802.11a/b/g/n/ac Wi-Fi network by repeating the signal (2.4GHz and 5GHz) from a Wi-Fi router and redistributing it in a new, extended location. The REC33A is equipped with a total of twelve amplifiers, including six 2.4/5GHz amplifiers and six low noise amplifiers. The amplifiers combined with a high gain external antenna and two internal high gain antennas provide up to 10,000 sq ft of additional Wi-Fi coverage. The Range Extender features AC1750 Wi-Fi speeds to provide enough bandwidth for the most demanding networks. It is built with one gigabit wired port for connecting and bridging an additional network device, such as a PC or TV, to your Wi-Fi network. The REC33A works with all brands of standard single or dual band Wi-Fi routers and service provider gateways. Unleash your iPads, tablets and smartphones with the most powerful, fastest, plug-in, universal Wi-Fi range extender available.

UP TO **10,000 SQ FT**

KEY FEATURES

Long Range Wi-Fi
Extend the range of any single or dual band Wi-Fi router by up to 10,000 sq ft*

Eliminate Wi-Fi Dead Spots
Achieve maximum range with 12 high power amplifiers and 3 high gain antennas

Blazing-Fast AC1750 Wi-Fi
Supports next-gen AC1750 Wi-Fi for 450Mbps on 2.4GHz and 1300Mbps on 5GHz

Simultaneous Dual Band Wi-Fi
Repeat both 2.4GHz and 5GHz signals simultaneously for maximum bandwidth

BoostBand™ Technology
Streamline Wi-Fi traffic and increase speeds by up to 2X*

Guest Networks & User Access
Create up to 8 networks for guests and restrict access to specific users

Wi-Fi Coverage Control
Adjust the distance of your wireless network for more control

AirPlay®, AirPrint™, & Home Sharing
Works with all Apple networking features

Gigabit Network Bridge
Connect one additional wired device, like a Smart TV, at gigabit speeds

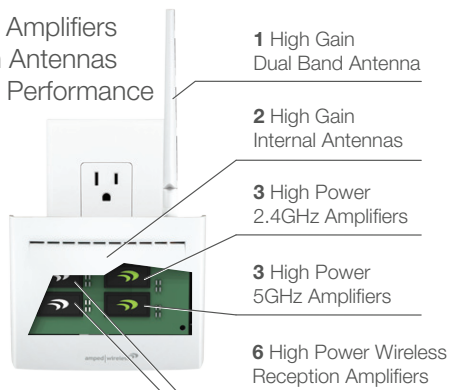

HOW IT WORKS

The REC33A expands the range of any standard Wi-Fi router by repeating the signal (2.4GHz and/or 5GHz) and redistributing it in a new, extended location.

HIGH POWER TECHNOLOGY

High Power Amplifiers & High Gain Antennas Boost Wi-Fi Performance

AMPED WIRELESS DIFFERENCE

Amplifiers	REC33A	Up to 600mW
	Standard Wi-Fi Devices	50mW
Antennas	REC33A	Up to 3dBi
	Standard Wi-Fi Devices	<1dBi

mW = Milliwatt (Output Power Measurement) dBi = Decibel (Antenna Gain Measurement)

2.4GHz | 5GHz SIMULTANEOUS

WORKS WITH 802.11 a/b/g/n **AC**

SIMPLE SETUP

1. Connect your tablet, smartphone, or PC to the Range Extender
2. Access the Setup Menu
3. Scan for and select your network

 Step-by-Step Installation Video included

BOOSTBAND TECHNOLOGY

Increase the overall speed and performance of your extended network by streamlining dual band network traffic through a single Wi-Fi frequency band between the Router and the Range Extender.

TECHNICAL SPECIFICATIONS

- Wireless Standard: 802.11a/b/g/n/ac
- Frequency Band: 2.4GHz / 5GHz
- Wireless Speed: AC1750
- Security: WEP, WPA, WPA2, WPA Mixed, WPS
- User Access Controls
- Adjustable Wireless Coverage
- Amplifiers: 3 x 2.4GHz Amplifiers
3 x 5GHz Amplifiers
6 x Low Noise Amplifiers
- Antennas: 1 x Detachable High Gain Dual Band Antenna
2 x Internal High Gain Dual Band Antennas
- Port: 1 x RJ-45 Gigabit Port
- Warranty: 1 Year

SETUP REQUIREMENTS

- Wireless 802.11a/b/g/n or ac 2.4GHz or 5GHz Network
- Computer, Tablet or Smartphone with Wi-Fi access and a web browser

PRODUCT CONTENTS

- High Power AC1750 Plug-In Wi-Fi Range Extender
- Detachable High Gain Dual Band Antenna
- Setup Guide
- CD: User's Guide & Installation Video

Specifications are subject to change without notice.

* Range specifications are based on performance test results. Actual performance may vary due to differences in operating environments, building materials and wireless obstructions. Performance may increase or decrease over the stated specification. Wireless coverage claims are used only as a reference and are not guaranteed as each wireless network is uniquely different. Maximum wireless signal rate derived from IEEE 802.11 standard specifications. Actual data throughput may vary as a result of network conditions and environmental factors. AC1750 wireless signal speeds achieved when connecting to other AC1750 capable Wi-Fi devices. Output power specifications are based on the maximum possible radio output power plus antenna gain.

May not work with non-standard Wi-Fi routers or routers with altered firmware or proprietary firmware, such as those from third party sources or some Internet service providers. May not work with routers that do not comply with IEEE or Wi-Fi standards.

AirPlay, AirPrint, Home Sharing are either registered trademarks or trademarks of Apple Inc. Wi-Fi, Wi-Fi Protected Setup, and WPA2 are either registered trademarks or trademarks of the Wi-Fi Alliance.
