Index

Please read these instructions carefully before you start to assemble this product.
Please carry out the steps in the order set out in these instructions.
Keep these instructions in a safe place for future reference.

When encountering the information icon, please refer to the relevant assembly step for additional comments and assistance.

Care and Safety Advice

- Please follow the instructions as listed in this manual.
- Having purchased a long patio cover, make sure you received all boxes according to the additional page (Extending your patio cover) on the instruction manual.
- As soon as you are ready to assemble your patio cover (you can start with this box), sort the parts and check in accordance with the content list.
- For safety purposes we strongly recommend the product to be assembled by at least two people.
- Some parts may have sharp edges. Please be careful when handling components. Always wear gloves, eye protection, and long sleeves when assembling or performing any maintenance on your product.
- Do not attempt to assemble the product in windy or wet conditions.
- Dispose of all plastic bags safely – keep them out of reach of small children.
- Keep children away from the assembly area.
- Do not attempt to assemble the product if you are tired, have taken drugs, medications or alcohol, or if you are prone to dizzy spells.
- When using a stepladder or power tools, make sure you follow the manufacturer's safety advice.
- Do not climb or stand on the roof.
- Heavy articles should not be leaned against the poles.
- Do not hang or lay on the profiles.
- Keep roof and gutter clear of snow, dirt & leaves.
- Heavy snow load on roof can damage the product making it unsafe to stand below or nearby.
- This product was designed and produced to be used as a **Patio cover** only.

Cleaning Instructions

When your product needs cleaning, use a mild detergent solution and rinse with cold clean water.

Do not use acetone, abrasive cleaners, or others special detergents to clean the panels.

Before Assembly

- This product must be assembled on a solid base (such as concrete or asphalt) and anchored to the ground.
- Choose your site carefully before beginning assembly.
- Sort the parts and check according to the contents parts list.
- Site surface needs to be leveled (mainly below the poles).
- Please consult your local authorities if any permits are required prior to constructing the product.
- Prior to enlarging the Patio Cover, several parts need to be dismantled, it is recommended to keep them in a safe place for future use.
- Note: Use only the parts registered in the content list, some parts may be surplus.

Tools & Equipment

T001 (Supplied)

Notes During Assembly

- Use a soft platform below the parts to avoid scratches and damages.
- Product dimensions can be adjusted to your specific needs:
 1. The wall-mounting profile (top-back) can be adjusted from **260 to 305 cm (102.4" to 120")** above ground. The adjusting is done when measuring and drilling (**Step 9**).

Please note the installation recommendations' height suggested in **Diagram A**.

It is possible to fix the Patio Cover back wall height at the lowest point of **260 cm/102.4"**. This method is optional if the assembly conditions and exterior walls do not allow to follow the suggested installation as appears in the manual.

Please note that the product appearance may slightly change as a result, however snow load weight does not change.

2. Poles distance from the wall can be adjusted from **226 to 286 cm (89" to 112.5")** as suggested in **Diagram B1**.

Poles distance from the side edges can be adjusted from **0 to 54 cm (0" to 21.3")** as suggested in **Diagram B2**.

The adjusting is done after assembly and before anchoring (**Step 27**) by sliding poles and profile **7040 + 7041** at the roof profiles' channels.

3. Wall mounting and distance from the wall determine the roof angle and the total depth of the product (distance of gutter from the wall). Higher wall mounting and shorter distance between wall and poles increase the roof angle and shorten the total depth as suggested in **Diagram C**.

Steps

Step 7,8: Please apply silicone sealants to the inner and outer edges of parts **7043 + 7042** as well as to the middle of parts **7029 + 7039** in order to prevent water from seeping in.

Step 16: Please apply silicone sealants above beam **7288 + 7290**, in order to prevent water from seeping in.

Step 18: Make sure that the angle between the back wall profile and the panel supporting profiles is 90 degrees. Assembly of the panels should start from the middle of the patio cover to each side alternately.

Step 27: Please adjust the poles (inside out and sideways) by sliding them to their final position prior to anchoring. Make sure that the poles distance from the Patio cover side edge does not exceed **54 cm/21.3"**.

***Please note:** Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid. (**Step 28**)

*Tighten all screws when completing assembly.

Note:

The wall anchoring kit supplied with this product is suitable only for concrete walls. Other wall types need an accordant wall fixation kit. (Contact your supplier)

Lire attentivement ces instructions avant de commencer le montage de ce toit de terrasse. Suivez bien les étapes indiquées dans l'ordre indiqué. Conservez ce mode d'emploi dans un endroit sûr pour référence ultérieure.

Lorsque vous rencontrez l'icône information, merci de vous référer à l'étape d'assemblage appropriée pour toute remarque et assistance additionnelle.

Recommandations d'entretien et de sécurité

- Suivez les instructions dans l'ordre indiqué dans ce manuel.
- Vous venez d'acheter un grand abri de terrasse, veuillez vous assurer que vous avez reçu toutes les boîtes mentionnées dans la page additionnelle du manuel d'instruction (Extension de votre abri de terrasse).
- Dès que vous êtes prêt à assembler votre abri de terrasse (vous pouvez commencer avec cette boîte), triezy les pièces et vérifiez le contenu indiqué dans la liste des éléments.
- Vérifiez que le paquet contient bien toutes les pièces.
- Pour des raisons de sécurité, nous recommandons vivement que le produit soit assemblé par deux personnes au minimum.
- Certaines pièces comportent des arêtes en métal. Soyez prudent en manipulant les pièces.
- Toujours porter des gants, des chaussures et des lunettes de sécurité pendant le montage.
- N'essayez pas de procéder au montage s'il y a du vent ou s'il pleut.
- Se défaire de tous les emballages en plastique en veillant à ne pas les laisser à la portée des enfants.
- Eloignez les enfants du site de montage.
- N'essayez pas de monter le produit si vous êtes fatigué, si vous avez pris des médicaments ayant un effet sur votre état d'éveil, des drogues ou si vous avez bu de l'alcool, ni si vous êtes sujet à des vertiges.
- Lorsque vous utilisez une échelle ou des outils électriques, veillez à suivre le mode d'emploi et les conseils de sécurité du fabricant des appareils.
- Ne pas grimper ni se tenir sur le toit.
- Ne pas adosser des objets lourds contre les poteaux.
- Ne pas accrocher ou poser des objets sur les profils.
- Veuillez vérifier auprès des autorités locales si des permis de construire ou autres autorisations sont requis avant l'installation du produit.

- Une charge de neige trop lourde sur le toit entraîne un risque d'endommagement du produit et de danger pour les personnes se tenant en dessous ou à proximité.
- Ce produit a été conçu et fabriqué pour être utilisé comme toit de terrasse uniquement.

Certaines versions de ce produit sont peintes.

Si la peinture a été égratignée pendant le montage, elle peut être réparée avec les coloris suivants: **Blanc – RAL 9016** **Gris – RAL 7012**

Instructions de nettoyage :

Lorsqu'il vous faut nettoyer le produit, utilisez Un détergent doux et rincez à l'eau froide propre. Ne pas utiliser d'acétone, de produits abrasifs ni d'autres détergents spéciaux pour nettoyer le panneau.

Avant l'assemblage

- Ce produit doit être assemblé sur une base solide (tel que du béton ou de l'asphalte) et ancré au sol.
- Choisissez votre site avec soin avant de commencer l'assemblage.
- Triez et vérifiez les pièces par rapport à la liste du contenu.
- La surface du site doit être nivelée (principalement en dessous des montants).
- Veuillez vous renseigner auprès des autorités locales afin de savoir si des permis sont nécessaires avant de débiter la construction du produit.
- Avant d'agrandir l'abri de la terrasse, plusieurs parties doivent être démontées et il est recommandé de les conserver dans un lieu sûr pour une utilisation ultérieure.
- Remarque : Utilisez uniquement les pièces enregistrées dans la liste de contenu, certaines pièces peuvent être excédentaires.

Outils et matériel requis

T001 (fournis)

Remarques à prendre en compte pendant l'assemblage

- Servez-vous d'un support en matière souple en dessous des pièces afin d'éviter les risques d'égratignures ou d'autres dommages.
- Les dimensions du produit sont ajustables en fonction de vos besoins particuliers :

1. Le profilé de raccordement de paroi (supérieur-arrière) est ajustable de **260 à 305 cm (102,4 à 120 po.)** au-dessus du sol. Cet ajustement s'effectue au moment de la prise de mesures et du perçage (**étape 9**).

Veillez prendre note de la hauteur d'installation conseillée indiquée dans le **Schéma A**. On peut fixer la hauteur de la paroi arrière du toit de terrasse au point le plus bas, à **260 cm/102,4 po.** Cette méthode est optionnelle si les conditions d'assemblage et les parois extérieures ne permettent pas de suivre l'installation suggérée telle qu'elle est présentée dans le manuel.

Veillez noter que l'aspect du produit peut être légèrement modifié en conséquence, mais que la charge de neige autorisée reste la même.

2. La distance des montants par rapport à la paroi est ajustable de **226 à 286 cm (89 à 112,5 po.)**, comme indiqué dans le **Schéma B1**. La distance des montants par rapport aux bords des côtés est ajustable de **0 à 54 cm (0 à 21,3 po.)**, comme indiqué dans le **Schéma B2**. Ces ajustements s'effectuent après l'assemblage et avant l'ancrage (**étape 27**), en faisant glisser les montants et les profilés **7040 +7041** sur les rails de profilés du toit.

3. Le raccordement à la paroi et la distance par rapport à celle-ci déterminent l'angle du toit et la profondeur totale du produit (distance de la gouttière par rapport à la paroi). Un raccordement plus élevé sur la paroi et une distance plus courte entre la paroi et les montants augmenteront l'angle du toit et réduiront la profondeur totale, comme montré dans le **Schéma C**.

i Étapes :

Étapes 7, 8 : veuillez appliquer un enduit en silicone sur les bords intérieur et extérieur des parties **7043 et 7042** ainsi qu'au milieu des parties **7029 et 7039** afin de prévenir toute infiltration d'eau.

Étape 16 : veuillez appliquer un enduit en silicone sur les poutres **7288 et 7290** afin de prévenir toute infiltration d'eau.

Étape 18 : assurez-vous que l'angle entre la paroi arrière du mur et le panneau de support des parois soit de 90 degrés. L'assemblage des panneaux devrait démarrer à partir du milieu de l'abri de la terrasse vers chaque côté et ce, alternativement.

Étape 27 : veuillez ajuster les poteaux (intérieur et latéralement) en les faisant glisser vers leur position finale avant de les fixer. Assurez-vous que la distance entre le côté de l'abri de la terrasse et les poteaux soit inférieure à "**54 cm/21,3**".

Étape... : Ancrez l'abri sur une surface solide comme du béton ou de l'asphalte, utilisez des vis et des chevilles adaptées. (Les vis et les chevilles ne sont pas fournies). (**Étape 27**)

- Lors de l'assemblage, veillez à serrer toutes les vis.

Remarque :

Le kit de fixation murale fourni avec ce produit est uniquement compatible avec le béton.

D'autres types de mur nécessitent un kit de fixation différent et compatible (contactez votre fournisseur)

Lea atentamente estas instrucciones antes de empezar a armar esta cubierta del patio. Por favor, siga los pasos en el orden indicado en estas instrucciones. Guarde estas instrucciones en un lugar seguro para referencia futura.

Cuando vea el icono de información, por favor consulte el paso de montaje pertinente para disponer de más comentarios y ayuda.

Consejos de cuidado y seguridad

- Siga las instrucciones que se dan en este manual.
- Una vez que haya comprado la cubierta de patio grande, asegúrese de haber recibido todas las cajas de acuerdo con la página adicional («Extender la cubierta de su patio») del manual de instrucciones.
- En cuanto esté listo para montar la cubierta de su patio (puede empezar con esta caja), ordene las piezas y haga una comprobación siguiendo la lista de contenidos.
- Ordene las piezas y compruebe la lista de los elementos.
- Por razones de seguridad, le recomendamos que intervengan dos personas, por lo menos, en el montaje del producto.
- Algunas piezas tienen bordes metálicos. Tenga cuidado al manipular los componentes. Use siempre guantes, zapatos y gafas de seguridad durante el montaje.
- No intente instalar el producto en días de mucho viento o humedad.
- Deshágase en forma segura de las bolsas de plástico – deben estar fuera del alcance de los niños.
- No permita la presencia de niños en el lugar de montaje.
- No trate de instalar el producto si está cansado, ha consumido drogas, medicamentos o alcohol, o si es propenso a mareos.
- Al utilizar escalera o herramientas mecánicas, asegúrese de seguir los consejos de seguridad del fabricante.
- No suba ni se pare en el techo.
- No apoye elementos pesados contra los postes.
- No cuelgue ni deposite pesos de los perfiles.
- Sírvase consultar a las autoridades locales si se requieren permisos para construir el producto.
- El techo y canaletas deben estar siempre limpios, sin nieve, suciedad ni hojas.
- Una carga pesada de nieve sobre el tejado puede dañar el producto haciendo inseguro permanecer debajo o cerca de él.
- Este producto ha sido diseñado y producido para usarse únicamente como cubierta para el patio.

Algunas versiones de este producto se entregan pintadas.

Si la pintura fue rayada durante el montaje, se puede reparar con los tintes siguientes

Blanco – RAL 9016 Gris – RAL 7012

Instrucciones de limpieza

Cuando el producto requiera limpieza, use una solución de detergente suave y enjuague con agua limpia y fría.

No use acetona, limpiadores abrasivos, u otros detergentes especiales para limpiar el panel.

Antes de comenzar el montaje

- Este producto debe montarse sobre una base sólida (como asfalto u hormigón) y anclarse al suelo.
- Elija su sitio cuidadosamente antes de comenzar el montaje.
- Clasifique las piezas y compruébelas según la lista de contenido.
- La superficie del sitio tiene que ser uniforme (principalmente por debajo de los postes).
- Por favor, consulte con sus autoridades locales si se requiere algún permiso antes de construir el producto.
- Antes de agrandar la cubierta del patio, hay que desmontar varias partes, se recomienda guardarlas en un lugar seguro para su uso posterior.
- Atención: use solo las piezas que aparecen en la lista del contenido, puede haber algunas piezas de sobra.

Herramientas y equipamiento

T001 (Suministrado(s))

Notas durante el montaje

- Use una plataforma blanda debajo de las piezas para evitar arañazos y daños.
- Las dimensiones del producto se pueden ajustar a sus necesidades específicas:

1. El perfil de montaje en la pared (parte superior trasera) se puede ajustar de **260 a 305 cm (102,4" a 120")** por encima del sueño. El ajuste se hace al medir y taladrar (**paso 9**).

Por favor, fíjese en la altura de las recomendaciones de instalación sugerida en el **Diagrama A**. Es posible fijar la altura de la pared trasera de la cobertura del patio al punto más bajo de **260 cm/102,4"**. Este método es opcional si las condiciones de montaje y las paredes exteriores no permiten seguir la instalación sugerida según aparece en el manual. Por favor, tenga en cuenta que el aspecto del producto podría cambiar ligeramente como resultado, aunque el peso de la carga de nieve no cambie.

2. La distancia de los postes con respecto a la pared se puede ajustar de **226 a 286 cm (89" a 112,5")** según se sugiere en el **Diagrama B1**.

La distancia de los postes desde los bordes laterales se puede ajustar de **0 a 54 cm (0" a 21,3")** según se sugiere en el **Diagrama B2**.

El ajuste se hace después del montaje y antes de anclarlo (**paso 27**) deslizando los postes y los perfiles **7040 + 7041** en los canales de los perfiles del tejado.

3. El montaje en la pared y la distancia de la pared determinan el ángulo del tejado y la profundidad total del producto (distancia del canalón de la pared). Un montaje más alto en la pared y menor distancia entre la pared y los postes aumentan el ángulo del tejado y reducen la profundidad total como se sugiere en el **Diagrama C**.

Pasos

Paso 7,8: Por favor, aplique selladores de silicona en los bordes interior y exterior de las piezas **7043 + 7042** además de en las partes medias de las piezas **7029 + 7039** para evitar que el agua se cuele en su interior.

Paso 16: Por favor, aplique selladores de silicona encima de la viga **7288 + 7290** para evitar que el agua se cuele en su interior.

Paso 18: Asegúrese de que el ángulo entre el perfil del muro posterior y el panel que soporta los perfiles es de 90 grados. El montaje de los paneles debería comenzar desde la mitad de la cubierta del patio a cada lado de forma alternativa.

Paso 27: Por favor, ajuste los polos (al revés y de lado) deslizándolos a su posición final antes de anclarlos. Asegúrese de que la distancia de los polos desde el borde lateral de la cubierta de patio no supere los **"54 cm/21,3"**.

***Por favor, tenga en cuenta:** Anclar este producto al suelo es esencial para su estabilidad y rigidez.

Es necesario completar esta fase para que su garantía sea válida (**Paso 28**).

- Apriete todos los tornillos cuando esté montado por completo.

Nota:

El conjunto de anclaje a la pared suministrado con este producto es adecuado únicamente para muros de hormigón.

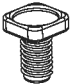

Otros tipos de muro necesitan un conjunto de fijación en pared en consecuencia. (Contacte con su proveedor).

Please read these instructions carefully before you start to assemble this product.
Please carry out the steps in the order set out in these instructions.
Keep these instructions in a safe place for future reference.

When encountering the information icon, please refer to the relevant assembly step for additional comments and assistance.

This icon indicates that the installer should be inside the product.

You will need

To assemble this product
(these items not supplied)

Safety

- Some parts may have sharp edges. Please be careful when handling components.
- Always wear gloves, eye protection, and long sleeves when assembling or performing any maintenance on your product.
- To prevent injuries, do not allow children to play under the product during assembly.

Before Assembly

- This product is suitable for Palram's Patio Covers range
- It is highly recommended to be assisted by a second person in some steps.
- Sort the parts and check according to the contents parts list.
- Prior to the installation, several parts from the Patio cover needs to be dismantle, it is recommend to keep them in a safe place for future need.
- Periodically check the kit components to assure that it remains stable.
- Note: Use only the parts registered in the content list, which are compatible with your Patio Cover (7999 for Sierra & 7029 for Feria / Tuscany), some parts may be surplus.

During Assembly

In case that you already own Palram Patio cover it is necessary to dismantle parts as described in **Step 1** in the kit assembly manual.

Option No. 1

Step 1b Sierra: In order to perform this stage, the gutter head must be removed.

Step 4: Select option **no. 1** if you would like to mount the supporting poles in different position than the merged position (**using part #7431**). Please continue from this position until **step 6**. (skip step 7&8) continue to step **no. 9**.

Step 6: Please make sure that distance from the poles and the kit connection to original patio cover does not exceed 60 cm.

Option No. 2

Step 4: Select option **no. 2** if the setting position of the mounting poles is not relevant. Please follow from **step 7**.

Step 7: It is optional to use the existing pole to support the connection between the new extension and the original patio cover.

In such a case please store the extra pole for future use or dispose properly.

Step 11: Tightening of the bolts is done from inside.

Pay attention: while installing the kit, alignment with original patio cover is important.

Tighten all screws when completing assembly.

Lisez s'il vous plaît attentivement ces instructions avant de commencer assembler ce produit.
Veuillez s'il vous plaît exécuter les étapes d'assemblage dans l'ordre défini dans ces instructions.
Conservez ces instructions dans un endroit sûr pour référence ultérieure.
Attention, le patio est livré avec 6 clefs (compatibles pour les 3 loquets).
Conserver le code indiqué sur une des faces des clefs pour les reproduire

Lorsque vous rencontrez l'icône d'information, veuillez vous référer à l'étape d'assemblage approprié pour remarque et assistance additionnels.

Cette icône indique que le constructeur doit ce placer à l'intérieur du produit.

Vous aurez besoin

Pour assemblage de ce produit (ces éléments ne sont fournis)

Sécurité

- Certaines pièces peuvent être coupantes. Soyez prudent lorsque vous manipulez les éléments.
- Porter toujours des gants, des lunettes de protection et des vêtements à manches longues lors de l'assemblage ou toute opération de maintenance sur votre produit.
- Pour éviter les blessures ne laissez pas les enfants jouer autour et dans l'objet lors de l'assemblage.

Avant Assemblage

- Ce produit est adapté pour les Gamme Couvres Patio de Palram.
- Il est vivement recommandé d'être assisté par une deuxième personne lors de l'installation.
- Triez les pièces et vérifiez selon la liste de contenu.
- Avant l'installation, certaines parties du couvre Patio doivent être démontées, il est recommandé de les conserver dans un endroit sûr pour besoin ultérieurs.
- Vérifiez les éléments du kit régulièrement afin de s'assurer qu'il reste stable.
- Utilisez uniquement les pièces indiquées sur la liste de contenu qui correspondent à votre pergola (7999 for Sierra & 7029 for Fera / Tuscany). Certaines pièces faillissent être excédentaires.

Pendant l'Assemblage

Dans le cas où vous avez déjà un Couvre Patio Palram il est nécessaire de démonter les pièces comme décrit à l'**étape 1** dans la notice de montage du kit

Option No. 1

Étape 1b Sierra: Afin de procéder à cette étape, la gouttière doit être ôtée.

Étape 4: Choisissez option **no. 1** Si vous voulez monter les poteaux de soutien en différents emplacements que celui de l'emplacement fusionné (**en utilisant la pièce #7431**). Continuez s'il vous plaît à partir de cette position jusqu'à l'**étape 6** (passez les **étapes 7 & 8**) et continuez à l'étape **no. 9**

Étape 6 : Assurez-vous s'il vous plaît que la distance des pôles et le kit connexion à votre couvre patio initial ne dépasse pas les 60 cm

Option No. 2

Étape 4: Choisissez option **no. 2** En cas où la position de réglage des pôles ne sont pas applicables. Continuez s'il vous plaît de l'**étape 7**

Étape 7 : Il est possible d'utiliser le pôle actuel pour soutenir la connexion entre la nouvelle extension et le couvre patio initial. Dans ce cas veuillez s'il vous plaît conserver le pôle supplémentaire pour usage ultérieur ou disposez-en correctement.

Étape 11 : Renforcement des vis se fait du côté arrière de la gouttière.

Attention: Lors de l'installation du kit il est important d'aligner le couvre patio original.

Renforcez toutes les vis dès que l'assemblage est achevé.

Lea atentamente estas instrucciones antes de empezar a armar esta cubierta del patio. Por favor, siga los pasos en el orden indicado en estas instrucciones. Guarde estas instrucciones en un lugar seguro para referencia futura.

Cuando vea el icono de información, por favor consulte el paso de montaje pertinente para disponer de más comentarios y ayuda.

Este icono indica que el instalador debe estar dentro del producto.

Seguridad

- Algunas piezas tienen bordes filosos. Tenga cuidado al manejar los componentes.
- Siempre use guantes, protección para los ojos y mangas largas cuando esté ensamblando o realizando el mantenimiento de su producto.
- Para evitar lesiones, no permita que los niños jueguen debajo del producto durante su montaje.

Antes del Montaje

- Este producto es compatible con la gama de Cubiertas de Patio de Palram.
- Se recomienda ser asistido por otra persona en el proceso de instalación.
- Ordene todas las piezas y verifíquelas de acuerdo con el índice de contenido.
- Antes de comenzar la instalación, algunas partes de la cubierta del patio deben ser desmontadas, se recomienda guardarlas en un lugar seguro para necesidades futuras.
- Revise periódicamente los componentes del kit para comprobar que se mantenga estable.
- Nota:** Atención: use solo las piezas que aparecen en la lista del contenido, (7999 for Sierra & 7029 for Feria / Tuscany), puede haber algunas piezas de sobra.

Durante el Montaje

En el caso de que usted ya tenga una Cubierta de Patio de Palram, será necesario que desarme las partes del modo descrito en el **paso 1** del manual de montaje del kit.

Opción N° 1

Paso 4: Seleccione la opción **no. 1** si prefiere montar los postes de apoyo en una posición diferente de la posición combinada (**mediante el uso de la pieza n°7431**). Continúe desde esta posición hasta el **paso 6. (Omita los pasos 7 y 8)** y siga adelante al **paso n° 9**.

Paso 6: Asegúrese de que la distancia entre los postes y el Kit de conexión a la cubierta del patio original no exceda de 60 cm.

Opción N° 2

Paso 4: Seleccione la opción **n° 2** si la posición de ajuste de los postes de montaje no es importante. Continúe desde el **paso 7**.

Paso 7: Existe la opción de utilizar el poste existente para apoyar la conexión entre la nueva extensión y la cubierta original del patio. En tal caso, sírvase guardar el poste adicional para su uso futuro o disponer del mismo adecuadamente.

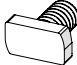

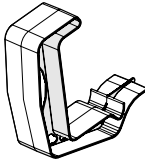

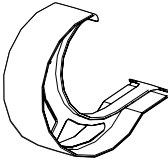

Paso 11: Los tornillos se aprietan desde el lado posterior del canalón.

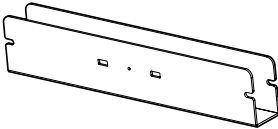

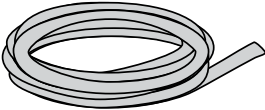

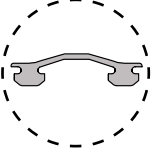

Ponga cuidado: al instalar el kit, es importante mantener la alineación con la cubierta del patio original.

Cuando termine el montaje, apriete bien todos los tornillos.
